## Reverse A Payment

In scenarios such as a check returned for insufficient funds, the payment can be reversed on the customer's account using the Reverse Payment option. This does not create a refund (no funds were collected) and is not considered a voided payment.

After a payment has been reversed it will display similar to what is shown below. If a note was added, it can be viewed by hovering over the green note icon. An exclamation point indicates the payment was reversed.

### Example Scenarios

- **Split Payments:** Customer has multiple accounts they would like the payment split between.
- **Transfer Payments:** Payment was made to the wrong account in error.
