

Route Management - Location Pin Details for DOW Do Not Match Selected DOW Map Filter

Last Modified on 01/23/2023 3:07 pm EST

When reviewing Pending locations in the Route Management tool, the Day of Week (DOW) filtering option available on the map was not matching the DOW that displays on the pin for a location. This has been fixed.

The screenshot displays the 'Pending' tab in the Route Management tool. At the top, there are filters for 'Front End Load' (set to 'Monday, Tuesday, Wed') and a 'LOAD' button. Below this is a table with columns: LOCATION, ADDRESS, QTY, SERVICE CODE, FREQUENCY, and START DATE. The table lists several pending locations with their respective service codes and frequencies. A green arrow points from the 'WED' filter in the table to the 'WED' filter in the map's filter bar. A red arrow points from the 'WED' filter in the map's filter bar to the 'WED' filter in the table. The map below shows a satellite view of a coastal area with a location pin. A popup window for the pin shows details: '1 6 Yard Trash Service 6x per week 6 Yard \$545.58', 'Avg Quantity: 6', 'Next Week #: 30', 'DOW: Tu', 'Material: Trash', and 'Week 19 (A)'.
