

Accounts (On Call Orders) - Logic Updated to Destination/Origin Field (14342) [Enhancement]

Last Modified on 01/25/2023 3:01 pm EST

Previously, if a Service Code had Default Destination enabled, the Destination/Origin field in the 'Create On Call Order' screen was required in order to save. Logic has been updated to remove the requirement and also allow for editing or clearing of the default destination on the Service Detail screen.
