

# Default Pricing - Create Default Rates for Service Codes

Last Modified on 01/23/2023 3:07 pm EST

A new default rate feature is now available for Service Codes. Users can create default rates for a service code specific to the Division, Service Region and Frequency of the active service it will be applied. Setting up a service code for default pricing is a two-part process involving the *Service Code Default Rate Setup* tool, to establish the requirements of the default rate and the *Service Code Setup* tool to enable default rates for use.

Pathway: Setup > Services > Default Pricing > Service Code; Setup > Services > Service Code
