

# Calendar- Incoming Text Messages Displayed on Wrong Day of the Account's Calendar (13845)

Last Modified on 01/23/2023 3:07 pm EST

A fix has been made to *Account > Calendar* where the receipt of a text message was displaying on the wrong calendar day. This has been fixed.

The screenshot displays a software interface with two main components. On the left is an 'EDIT CONTACT' window with a 'History (2)' tab. The history shows two entries: 'Jul 06 2022 Text Message Received - has marked your service at [redacted] This message is to inform you that our driver as Service Completed on Jul 5, 2022.' and 'Jul 01 2022 Email Sent'. On the right is a calendar view for July. The calendar shows dates from Jun 28 to Jul 1. A tooltip for Jul 5 shows a 'Service Status Update (2)' icon and a message: 'This message is to inform you that our driver has marked your service at [redacted] as Service Completed on Jul 5, 2022.' Other calendar events include 'Invoice', '(1) Logins', and 'Upgraded Customer Portal Invitation'.

Pathway: *Customer > Search > Calendar*
