

# Request Audit – Screen Modifications and Response Code Filter Added (14003) [Enhancement]

Last Modified on 01/26/2023 4:44 pm EST

The following enhancements have been made to the Request Audit screen:

- Upon entry, the tool will default to display a blank screen. Results will load once selections have been made using the filter drop down options at the top.
- Addition of 'Response Code' filter. Only one response code may be selected at a time.
- Logic updated to the Response Code column to display the name of the response code. Previously this displayed as a numeric value.
- Logic updated to the screen display for response codes that are not Success. If the Response Code is not Success, the entire row and any subsequent rows will be highlighted red.

The screenshot shows the 'REQUEST AUDIT' interface. At the top, there are filters for 'USER' (AJ Wilson (inactive), Alfred P.), 'RESPONSE CODE' (All), and 'WITHIN LAST' (Last 30 days). A search bar is on the right. The table below has columns for ID, TIMESTAMP, END TIMESTAMP, USER, REQUEST PATH, STATUS, SESSION ID, IP ADDRESS, and RESPONSE CODE. The first row (ID 4185919) shows a 'Success' response. The second row (ID 4185918) shows a 'Success' response. The third row (ID 4185917) is highlighted in red and shows a 'Bad Request' response. The fourth row (ID 4185916) shows a 'Success' response.

ID	TIMESTAMP	END TIMESTAMP	USER	REQUEST PATH	STATUS	SESSION ID	IP ADDRESS	RESPONSE CODE
