Link Waste Profiles to a Charge Code

Last Modified on 05/26/2026 8:16 am PDT

Pathway: *Accounts > Account Screen*

When a charge code does not have a waste profile linked to it, a question mark displays for the service code.

1. Expand the Service Code and review its charge code(s).
    - Charge codes that **do not** have a waste profile linked will display a question mark inside a blue bubble.
    - Charge codes that have a waste profile linked (that is not expired) will display a check mark inside a green bubble.
    - Expired waste profiles display as a exclamation point in a red bubble.
2. Select the Hazardous Waste icon to display the Link Waste Profile popup editor.
3. Click on the Link icon of the waste profile you would like to link to the service charge.
4. Close out of the popup editor and verify a green check mark displays for the charge code.
