

Route Management Basics

Last Modified on 03/07/2024 2:56 pm EST

Pathway: *Operations > Route Management*

The Route Management tool is used to manage new and existing stops on a route and should be included in daily operation activities. This article details the functionality and purpose of each tab in Route Management.

 Service Locations do not display upon open. Use the filtering options provided and select Load the screen.

The screenshot shows the Route Management interface with the following elements:

- Navigation tabs: Pending, Current, Re-Number
- Filters: Select Division, Select Service Region, Select LOB, Monday, Tuesday, Wedi
- Buttons: LOAD
- Table header: LOCATION, ADDRESS, QTY, SERVICE C..., FREQUENCY, START DATE, ROUTE, SEQUENCE, WEEK OF MONTH
- Footer: MAP TYPE (Route), DAY OF WEEK (Mon, Tue, Wed, Thu, Fri, Sat, Sun), DISPLAY ALL LINE OF BUSINESS (checkbox)

Permissions

The following permissions are required to view and use the Route Management screen:

Permission ID	Permission Name
87	Route Management

Pending Tab

The Pending tab shows stops that haven't been assigned to a route yet and provides the functionality to assign and post stops to a route. The Pending screen includes an interactive map that will display upon selection of a service location.

Pending Tab Field Descriptions

Field	Description
<p>IMPORTANT: The Pending tab must be reviewed on a regular basis.</p>	
Filter Selections	
Select Division	Filters to only displays routes of the selected division.
Select Service Region	Filters to only display routes of the selected service region.
Select LOB	Filters to only display routes of the selected line of business.
Day of Week	Filters to only display the routes running for the selected day of the week.
Load	Loads all service locations (not assigned to a route) based on the filter selections.
Service Location Details	
Location	Displays the name and ID of the service location.
Address	Displays the address for the service location.
Qty	Displays the quantity of equipment requested. Equipment type is referenced under the Service Code column for the location.
Service Code	Indicates the type of waste the equipment holds.
Frequency	Indicates the pickup frequency requested and preferred days of the week.
Start Date	The requested start date for service.

Field	Description
Route	Displays a drop down list of routes to select and assign to a pending service location. The system will provide a suggested route to assign, and will also include an "Others" list of routes that can be assigned. If a location has a frequency greater than 1x per week, each scheduled service must have a route assigned to 'Post' the record.
Sequence	<p>If the route will be sequenced, enter the sequence number here.</p> <div style="border: 1px solid #ccc; padding: 5px; background-color: #e6f2e6;">  Use the <i>Current</i> (tab) to view/modify sequences for all locations on a route. </div>
Week of Month	For customers who are monthly, or on a bi-weekly schedule, select the week of the month the location will be serviced.
Post	<p>Posts the pending service location to a route. If a location has a frequency greater than 1x per week, each frequency must have a route assigned to 'Post' the record.</p> <div style="border: 1px solid #ccc; padding: 5px; background-color: #e6f2f2;">  Once a location has been posted, the location will no longer display in the Pending tab. </div>

Pending (Tab) Interactive Map Overview

Use the interactive map in the Pending tab to assist in identifying the optimal route for adding a pending service location. Apply filters and review nearby routes to streamline the process.

Load the Map

Display the map by selecting a location from the upper grid. Use the features of the map to help determine the best route to add the selected service location to.

Map Details

Field/Filter Tool	Description
Map Type	Map based on the following options: <ul style="list-style-type: none"> Route Day of Week Service Code Material Next Service Day
Marker Clustering	Auto-groups locations that are in close proximity to one another and displays a total count for the area.
Day of Week	Select to display routes by specific day(s) of the week.
Week Offset	Select to only display A day routes, or B day routes.
Frequency	Select to display routes based on their pickup frequency.
Next Scheduled Date	Select to display routes for a specific date.
Radius Tools	Draw or circle a radius around targeted locations and right-click to edit only the locations within the radius. To remove, right-click within the radius and select 'Remove Shape'.
Map/Satellite Toggle	Toggle between Map or Satellite views.

Zoom	Zoom in or zoom out of an area.
Legend	Provides a color legend to identify routes.

Current Routing Screen

Double-click within the row of a current location to access the Current Routing screen. This screen displays details of the location's current route, a map showing the location along with pins of other locations on the same or different routes, and provides the option to change the route for the selected location.

The screenshot shows the 'CURRENT ROUTING' screen. At the top, there is a table with the following data:

SCHEDULE ID	START	FREQUENCY	END DATE	WEEK	ROUTE	SEQUENCE
298171	Wed 06/08/22	1x per week		24	HOU 201	0

Below this is the 'NEW ROUTING' section with a table:

START DATE OF ROUTE CHANGE	WEEK	ROUTE	SEQUENCE
<input checked="" type="checkbox"/>	24 (B)	HOU 201	0

The map below shows a location pin for 'Sports Complex at Shadow Creek Ranch' highlighted in red. A red arrow points to the 'ROUTE' column in the 'NEW ROUTING' table with the text 'Click within column to change route'. Another red arrow points to the red pin with the text 'Pin of Location being viewed'. A legend on the right side of the map lists routes: HOU 201 (104), HOU 202 (81), HOU 203 (12), HOU 206 (2), and Not Routed (1). Other locations are marked with green pins. A 'SAVE' button is at the bottom center.

Re-Number Tab

Use the Re-Number tab in Route Management to re-number stop sequences. Stops with a current sequence of '0' are not included in sequence re-numbering.

The screenshot shows the 'Re-Number' tab in Route Management. At the top, there are tabs for 'Pending', 'Current', and 'Re-Number' (which is selected). Below the tabs, there are dropdown menus for 'DIVISION' (CORPUS) and 'DAY OF WEEK' (Wednesday), and a 'LOAD' button. A table lists routes with the following columns: 'SELECT ROUTE(S)', 'DAY OF WEEK', 'STOPS', 'QUANTITY', and 'VIEW MAP'. The 'SEQUENCE GAP' is set to 4. A 'RE-NUMBER' button is located to the right of the table.

SELECT ROUTE(S)	DAY OF WEEK	STOPS	QUANTITY	VIEW MAP
<input checked="" type="checkbox"/> COR 101	3	60	62	
<input type="checkbox"/> COR 201	3	120	126

<input type="checkbox"/> COR 401	3	244	250	
<input type="checkbox"/> COR DUMPSTER DEL/REM	3	1	5	
<input type="checkbox"/> ALVARO	3	4	4	

Field Descriptions

Field	Description
Filters	
Division	Filters to only display the routes of the selected division.
Day of Week	Filters to only display the routes running for the selected day of the week.
Fields and Features	
Load	Loads routes onto the screen based on the filtering options selected. By default, the Re-Number screen does not automatically load upon open and requires Load to be selected.
Select Routes (Check Box)	Check box to include the route in sequence re-numbering. If all routes should be included, select the header check box.
Day of Week	Displays a numeric value to identify the day of the week for the route. 1- Monday 2- Tuesday 3- Wednesday 4- Thursday 5- Friday 6- Saturday 7- Sunday
Stops	Indicates the number of stops the route includes.
Quantity	Indicates the total service quantity across all stops.
View Map	Displays the route on a map.
Sequence Gap	Establishes the sequential order for stops on the route. Stop with a current sequence of '0' will not be included in sequence renumbering. <i>Example: If 4 is entered, stops on the route will be sequenced as 4, 8, 12, 16 and etc.</i>
Re-Number	Renumbers the selected routes using the Sequence Gap entered.
