

Current (Tab)- Modify a Route

Last Modified on 05/27/2025 7:21 am PDT

Pathway: Operations > Route Management > Current (Tab)

The Current tab displays a list of service locations (stops) that are assigned to a route. Changes made to a stop from the Current tab are permanent. If this a one-time change, the Dispatch tool in Operations should be used.

Permissions

The following permissions are required to process a route change for a location:

Permission ID	Permission Name
87	Route Management
445	Import/Export Current Routes from Route Management <i>Note: If a user does not have this permission, the Import/Export buttons are hidden from view.</i>

Process a Route Change

From the Current tab, users can quickly make route modifications to one or multiple locations at a time using features available on the screen.

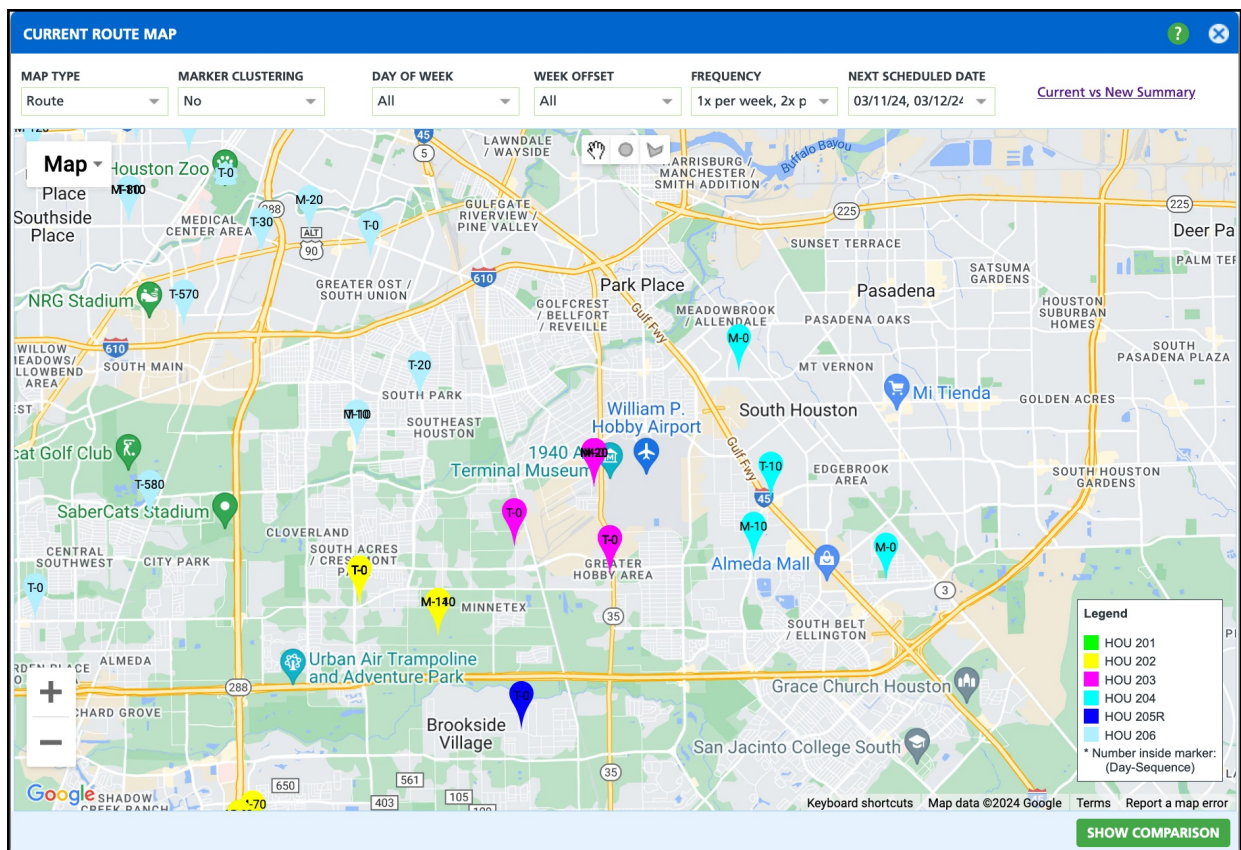

Before making changes, select the Route Summary link to review the distribution of services across all routes. This will help to maintain a balance when assigning stops to new routes.

- Make a Selection from the following screen filters:
 - Select the **Division** you would like to review stops for.
 - Select a **Service Region**. Allows for multi-selection.
 - Select a **Line of Business**. Allows for multi-selection.
 - Select a **Route**. Allows for multi-selection.
 - Select a **Weekday**. Allows for multi-selection.
- Click **Load** and the screen will load stops matching the selected filter criteria.
- Assign a new route to a location using one of the following methods:
 - Select the check box to the left of the Location(s) you would like to make changes to and select the **Edit** button. This will open the *Edit Site Service Schedule* popup editor. Enter a new route and effective date and it will be applied to all locations that were selected.
 - Click within the "New Route" column for a location and select a new route from the drop down list.
- Click **Post Routing Change** to update the location(s).

Process a Route Change Using the Interactive Map

From the Current tab, users can quickly make route modifications to one or multiple locations at a time using the interactive map.

- Make a Selection from the following screen filters:
 - Select the **Division** you would like to review stops for.
 - Select a **Service Region**. Allows for multi-selection.
 - Select a **Line of Business**. Allows for multi-selection.
 - Select a **Route**. Allows for multi-selection.
 - Select a **Weekday**. Allows for multi-selection.
- Click **Load** and the screen will load stops matching the selected filter criteria.
- Select the check box to the left of the Location(s) you would like to view on the map.
- Click on the **Map** button to display the Current Route Map in a popup window.

Make a Route Change to Multiple Locations

1. Using one of the radius tools available, create a radius around the service locations for which you would like to change the route.
2. Right-click anywhere within the radius and select **Edit Service Schedule(s)**.
3. Select a **Route** from the Site Service Schedules editor that displays.
4. Enter an **Effective Date**. Leave the Effective Date field blank and the location's next scheduled service date will apply.
5. Select **Save** and all service locations within the radius will update to the new route.
6. To remove a radius, right click within it and select "Remove Shape."

Make a Schedule Change to a Single Location

1. Right-click on the pin for the service location you are modifying.
2. Select **Edit Service Schedule**.
3. Select a **Route** from the Site Service Schedules editor that displays.
4. Enter an **Effective Date**. Leave the Effective Date field blank and the location's next scheduled service date will apply.
5. Select **Save** and the location will be updated.

Export and Import

Use the Export and Import feature to modify routes externally, then import them back into Route Management to post the routing changes in the system. See the [Export/Import](#) article for key import logic and step-by-step instructions.

The screenshot shows the Route Management interface with the 'Export' and 'Import' buttons highlighted in red. The interface includes tabs for 'Pending', 'Current', and 'Re-Number'. Below these are filters for location ('HOUSTON'), market ('HOUSTON OPEN MARKET'), service type ('Commercial'), and route ('HOU 201, HOU 202, ...'). A 'LOAD' button is also visible. The main table lists service locations with columns for SITE, QTY, SERVICE CODE, FREQ / NEXT SVC, ROUTE, SEQ, and DOW.

SITE	QTY	SERVICE CODE	FREQ / NEXT SVC	ROUTE	SEQ	DOW
43890002 COP - SHADOW CREEK RANCH SPORT 13050 SHADOW CREEK PKWY PEARLAND, TX 77584-7458	1	8 Yard Trash Service 8 Yard FL MSW	1x per week 02/19/25 Week 8	HOU 201	0	Wed

43890032 COP - WEST PEARLAND LIBRARY 11801 Shadow Creek Parkway Pearland, TX 77584	1	4 Yard Trash Service 4 Yard FL MSW	2x per week 02/25/25 Week 9	HOU 201	0	Tue
43890001 COP - FIRE STATION #8 12255 SHADOW CREEK PEARLAND, TX 77584	2	4 Yard Trash Service 4 Yard FL MSW	1x per week 02/19/25 Week 8	HOU 201	0	Wed

Export

Filter the screen to load only the routes intended for export. Once the screen loads, select the export option that aligns with the process. The data for each service location will be exported in .csv format, allowing for route information edits.

The screenshot shows the Route Management interface with the 'Export' button highlighted in red. An Excel spreadsheet overlay is visible, showing the exported data in a table format. The table includes columns for Record Id, Site Id, Site Name, Site Address, Site City, Site State, Site Postal, Site Full, Site Phone, Site Latitude, Site Longitude, Business Hours, and Access Information.

Import

After all route edits are complete, save the file and import it back into Route Management using the Import feature. Import logic will map the revisions based on the Route ID found in the file. A blue notification icon will display when the import is complete. Imported changes are applied to the affected routes once "Post Routing

Changes" is selected.

File format requirement: CSV
