

Account Class Setup

Last Modified on 06/29/2026 7:32 am PDT

Pathway: Setup > Account > Account Class

Account Class defines the billing and payment processing criteria for an account or group of accounts. It is assigned upon account creation and also serves as a filter for various reports and tools within the application.

 Select the **green plus +** icon to **add** a new account class, or double click on an existing one to **edit** a current setup.

The screenshot displays the 'ACCOUNT CLASS SETUP' interface. At the top, there is a navigation breadcrumb 'SETUP > ACCOUNT > ACCOUNT CLASS SETUP' and a search bar. Below the breadcrumb is a table with columns: ID #, NAME, DEFAULT ACCOUNT CREDIT LIMIT, DEFAULT ACCOUNT TERM, DEFAULT REBATE PAYMENT TYPE, DEFAULT BILL BY SITE, GL SEGMENT, GL ACCOUNT, TYPE, CREATE CONTACT DEFAULT, DEFAULT GEOCODING TYPE, ACTIVE, CREDIT CARD PROCESSING FEE TYPE, ACH PROCESSING FEE TYPE, and ALLOW PORTAL ACCESS. A red plus icon in a square is highlighted in the top left corner of the table. Overlaid on the table is the 'ADD ACCOUNT CLASS' modal form. The modal has a blue header and a close button (X). It contains several tabs: 'Details' (with a red tick mark and '2'), 'Customer Portal' (with a red tick mark and '2'), 'Payment Processing' (with a red tick mark and '2'), 'Status Management' (with a red tick mark and '1'), and 'Finance Charges and Other Fees'. The 'Details' tab is active. It contains various fields with dropdown menus and checkboxes. Fields with red borders indicate mandatory or incomplete fields. A 'Translate' button is visible next to the NAME field. A 'Save' button is at the bottom of the modal.

The Account Class Setup includes a list of all account classes that have been defined. The columns provided are only a few of the configuration fields associated with an Account Class. To learn more about each column header, dive into the field descriptions provided for each tab.

Expand All Sections

Collapse All Sections

Helpful Tip: To search all text using **CTRL-F**, you must first click on the Expand All Sections button.

The **Add Account Class** page allows users to create a new Account Class using a five-tab interface. Each tab features a **red tick mark** displaying the number of fields within each tab that needs to be completed before saving. While several fields include default values to speed up entry, these remain fully editable to accommodate your specific requirements. In addition, fields that are mandatory are highlighted in red.

Field Descriptions: Details

Fields	Descriptions
Name <i>(Required)</i>	The name of the Account Class.
Active <i>(Required)</i>	Controls if the account class is available for use. <ul style="list-style-type: none"> • Yes - Available • No - Not Available
Type	Indicates the business Type the account class falls under. <ul style="list-style-type: none"> • Business and Residential note: When this field is set to either <i>Business</i> or <i>Residential</i>, the Site Class field is displayed on the Basic Settings tab of the Edit Site screen.
GL Account	Identifies which GL segment the account class is available to. Refer to the GL Segmentation article for further information.
GL Segment	The GL Segmentation for the GL Account.
Deposit GL Account	Identifies the Deposit GL Account used for accounts belonging to the account class.
Deposit GL Segment	Identifies the GL Segment used for accounts belonging to the account class.
Default Account Credit Limit	The credit limit sets the threshold at which the hauler contacts the customer for payment or suspends service until the balance falls below the limit. The billing screen provides alerts when a customer exceeds their credit limit during the billing process.

Default Account Term	<p>Identifies the default Term accounts assigned to the account class will follow for billing.</p> <p><i>Term: The length of time a payor (customer) has after the invoice date to pay the amount due.</i></p>
Default Rebate Payment Type	<p>Identifies the default payment type used by the account class for rebate payments.</p>
Default Bill By Site	<p>Default setting for the 'Bill Per Site' field in the Add or Edit Account editor for accounts assigned to the account class.</p> <ul style="list-style-type: none"> • Yes - Checks the 'Bill By Site' check box in the <i>Add or Edit Account</i> editor. • No - Removes the selection from the 'Bill By Site' check box in the <i>Add or Edit Account</i> editor.
Default Contact Link Type	<p>Defaults the contact to either account level or site level when a contact is added.</p>
Default Contact Service Notification	<p>If set to Yes, when a new contact is added to an account or site, the <i>Receive Service Notifications</i> field in the Add Contact screen will default to Yes for that contact.</p>
Default Geocoding Type <i>(Required)</i>	<p>Determines the default pin placement used when site locations are displayed on a map after a site has been geocoded. This setting is also used by the Site Geocoding & Service Time screen as the default option when the "Geocode All" feature is selected. Available options include Roof Top or Street Side placement.</p>
Geofence Radius (Meters)	<p>Creates a virtual perimeter around the location's address to indicate proximity of the truck to the service location. This can be overridden at the Site Class level.</p> <p>NOTE: Setting the radius too low (e.g., 1 meter) can interfere with Residential Mode in NavuNav. Lowest recommended setting is 20 meters.</p>
New Account Notification Template	<p>Template that is used for new accounts. Notifications are sent based on the account contact's notification preferences.</p>
Enable Linking Contacts to All Sites	<p>Enables linking contacts to all sites belonging to an account.</p> <ul style="list-style-type: none"> • Yes - Enabled • No - Disabled
Load Active Accounts In Pipeline Map	<p>Option to display active accounts on the Pipeline Map (Sales > Pipelines > Pipeline Summary).</p> <ul style="list-style-type: none"> • Yes - Accounts display • No - Accounts do not display
Exclude from NavuSales	<p>If enabled, prevents sync to the iPad.</p>

Enable Duplicate Account and Site	If enabled, the system will check for a duplicate accounts/sites when a new account/site is created. The default setting for this field is 'Yes'.
Hide Rate On Work Order Format	If selected, rates will be hidden from view on scale tickets or work orders that support printing rates. This setting also exists at the account level.
Require Billing Contact	If checked, a billing contact is required when creating an account, and the Contact Name, Contact Email, and Contact Phone fields become required.
Require Generator Type	If checked, setting requires accounts to identify the Generator Type. <i>*Applies to account classes dealing with Hazardous or Medical Waste.</i>
Require Site Class	If checked, a site class must be selected when creating a new account or a site.

Details Setup

- Complete the following required fields:
 - Enter a **Name** for the Account Class.
 - Select 'Yes' from the **Active** field to activate the account class.
 - Select the preferred **Geocoding Type**.
 - Select 'Yes' from **Require Generator Type** if the account class deals with Hazardous or Medical Waste. Otherwise, select 'No'.
 - Select 'Yes' to **Enable Automatic Status Updates** and update the status of the account between the active and credit hold statuses. Otherwise, select 'No.'
 - Select 'Yes' from **Auto Credit Hold Placement** if the status of an account belonging to the account class should be updated to 'Credit Hold' if the account is past due.
 - Select 'Yes' from **Auto Credit Hold Removal** if the status of an account belonging to the account class should be updated to 'Active' once a past due payment has been received.
 - Select the **Status Update Time** for accounts to be placed on or removed from credit hold status.
- Complete additional fields based on your company's setup requirements.
- Click **Save** when finished.

Customer Portal Tab

This section outlines the fields in the **Customer Portal** tab that are essential for the Customer Portal setup. For additional setup details, see [Customer Portal Setup](#) documentation.

Field Descriptions: Status Management

Field	Description
Enable Automatic Status Update <i>(Required)</i>	Select 'Yes' to enable the system to automatically update an account's status. This setting applies to applying and removing an auto-credit hold as well as other automatic status updates.
Auto Credit Hold Past Due Days	The number of days a single invoice must be past due before an auto-credit hold is applied. An account requires just one past-due invoice for the credit hold to take effect. <i>'Auto Credit Hold Placement' must be enabled for settings here to apply.</i>
Auto Credit Hold Minimum Past Due Amount	The amount (in dollars) an account must be past-due before auto-credit hold is applied. <i>'Auto Credit Hold Placement' must be enabled for settings here to apply.</i>
Auto Inactive Account/Site Days	The number of days an account or site must remain inactive before it is automatically set to an inactive status. Site logic used <ul style="list-style-type: none"> The site must have no active services associated with it. Once the defined number of days has passed, the site will automatically be set to inactive. Account logic used <ul style="list-style-type: none"> The account must have no active sites associated with it and a \$0 AR balance. Once the defined number of days has passed, the account will automatically be set to inactive. <p>This value must be greater than 0 for the process to automatically update statuses to inactive.</p>

Auto Credit Hold Placement	Select 'Yes' to enable the system to place a past-due account on a credit hold. This field must be enabled for 'Auto Credit Hold Past Due Days' and 'Auto Credit Hold Minimum Past Due Amount'.
Auto Credit Hold Removal	Select 'Yes' to remove an account from a credit hold status after the past-due balance has been paid.
Status Update Time	The time the system will process status updates. It's recommended to schedule this during off-hours when system activity is low and to avoid disrupting operations.
Run Daily Auto Apply	Select 'Yes' to enable a daily check for unapplied payments and credits on an account and applies them to the account's oldest invoice balances first.

Finance Charges and Other Fees Tab

The Finance Charges/Late Fees tab establishes how charges and fees are applied to an account. To learn more, see the [Finance Charge and Late Fee Setup](#) documentation.

Field Descriptions: Finance Charges and Other Fees

Field	Description
-------	-------------

<p>Finance Charge Type</p>	<p>Establishes how a late fee will be applied on an account's invoice statement. Based on the selection that is made, functionality for other fields may change.</p> <ul style="list-style-type: none"> • During Billing: The finance charge or late fee will be calculated during the billing process for a scheduled billing batch and included on the invoice. • Manual Flat Fee: A manual flat fee must be applied using the <i>Calculate Manual Finance Charges and Late Fees</i> tool in the Accounting module. • One Time Fee Per Invoice: A finance charge or late fee will be applied one time per invoice and is only calculated for Scheduled Batches. • None: Finance Charges will not be applied if None is selected. If there are values entered for Charge Code, Annual Rate, Charge Minimum, and Past Due Amount, they are no longer applicable.
<p>Annual Rate/Rate</p>	<p>The Annual Rate applied to accounts belonging to the account class.</p> <p>Rate Application is dependent on the Finance Charge Type:</p> <ul style="list-style-type: none"> • During Billing: Identified as a percentage of the past due amount. • Manual Flat Fee: This field does not apply to this option. • One Time Fee Per Invoice: Applied as a flat rate. • None: Not applicable
<p>Charge Code</p>	<p>The charge code that billing will use for applying finance charges and late fees to an invoice.</p>
<p>Charge Minimum</p>	<p>The minimum dollar amount an account must be charged. If the percentage value entered in the 'Rate' field is less than the charge minimum, the charge minimum is applied.</p>
<p>Past Due Minimum</p>	<p>The minimum dollar amount an account must be past due for late fees to apply.</p>
<p>Insufficient Funds Fee</p>	<p>Fee that will be applied for insufficient funds. If a value greater than '0.00' is entered, the <i>Insufficient Funds Fee Charge Code</i> field is required.</p>
<p>Insufficient Funds Fee Charge Code</p>	<p>The charge code to be applied at billing when an insufficient fund fee is incurred.</p>
<p>Credit Hold Placement Fee</p>	<p>The amount that will be applied if an account is placed on a credit hold. If a value greater than '0.00' is entered, the <i>Credit Hold Placement Fee Charge Code</i> field is required.</p>
<p>Credit Hold Placement Fee Charge Code</p>	<p>The charge code that will be applied at billing when a credit hold placement fee is incurred.</p>
<p>Per Invoice Fee 1 Charge Code</p>	<p>The charge code for <i>Per Invoice Fee 1</i>, which will be printed on invoices. When a charge code is selected, the Per Invoice Fee 1 field is enabled.</p>

Per Invoice Fee 1	Manual charge that gets added to invoices at billing. The amount entered here can be overridden at the account-level.
Per Invoice Fee 2 Charge Code	Identifies the charge code for Per Invoice Fee 2, which will be printed on invoices. When a charge code is selected, the Per Invoice Fee 2 field is enabled.
Per Invoice Fee 2	Manual charge that gets added to invoices at billing. The amount entered here can be overridden at the account-level.

Application of Credit Hold Placement Fee in Customer Service

(Only applies to automated credit holds)

Pathway: Setup > Account > Account Class

If an account qualifies for an automated credit hold, and the account class includes a credit hold placement fee and charge code, a manual charge will be created when the account is placed on "Credit Hold." For this, the following logic is used:

- Credit Hold Placement Fee must include a value be greater than '0'
- Credit Hold Placement Fee Charge Code must exist.
- The account class to which the account belongs must have the necessary auto credit hold settings enabled and defined in the Status Management tab.

The screenshot displays the account setup for 'Cabra Los Angeles' (49044). Key details include:

- Account Information:** 1234 S Broadway, Los Angeles, CA 90015-4005, US, (O) +1 555-555-5858.
- Account Class:** QAWASTE, AUTOCH, QA Billing Cycle.
- Terms:** Net 20, Invoice Delivery: Printed.
- Current Status:** ADVANCE - MONTHLY, Billed Thru Date Apr 30, 2024.
- Financial Summary:** CURRENT: 0.00, 1-30: 0.00, 31-60: 0.00, 61-90: 217.50, 91-120: 119.80, 120+: 0.00, TOTAL: 337.30.

 Below the account details, a 'PENDING' section shows a credit hold placement fee of \$18.00, dated 05/17/2024. The 'ACTIVE SERVICES' table lists:

- 2 3 Yard Trash Service (C3F0) at \$100.00 per month.
- 1 30 Yard Open Top Service - MSW (99D4) at \$0.00 per month.

 The 'CALENDAR' view for May 2024 shows a 'Credit Hold Placement Fee' event on May 17, indicated by a red arrow.
