

Available Service Codes

Last Modified on 08/05/2024 4:58 pm EDT

Pathway: [Setup > Services > Available Service Code](#)

The **Available Service Code Setup** screen identifies the services provided to a division and further refines them to specific service regions. This screen also offers the option to apply division-specific default charges and pricing.

Permissions

The following permissions are required to view and edit in the Available Service Code Setup screen:

Permission ID	Permission Name
118	Setup \ Services

Prerequisite

The Available Service Code Setup screen displays active service codes created in [Setup > Services > Service Code](#). If a service code doesn't exist, is inactive, or needs to be updated, it should be done in the Service Code Setup screen. Additional information can be found here: [Service Code Setup](#)

Field and Filter Descriptions

Field/Filter	Description
Filters	
Line Of Business	Filters to display the service codes of the selected Line of Business.
Division	Filters to display the service codes of the selected Division.
Equipment Type	Filters to display the service codes matching the selected Equipment Type.
Material Type	Filters to only display the service codes matching the selected Material Type.
Fields	
Service Code	Displays the service code that the setup applies to. Service codes are created and maintained in Setup > Services > Service Code . A red background indicates the service code is not available to any service regions in the division.
Equipment Type	Displays the equipment type that is linked to the service code. If an equipment type is not populated for a service code, the Default Charge Codes tab will not display in the lower grid.

Material Type	Displays the Material Type linked to the Service Code.
Availability	Controls the availability of the service code to the service regions within a division. If the availability is set to "None," the service code for the division will be highlighted with a red background.

Available Service Code Setup

In the Availability column, users can specify the regions where a service code is available. Clicking in the column for the desired service code will display a drop down menu with the availability options.

LINE OF BUSINESS	DIVISION	EQUIPMENT TYPE	MATERIAL TYPE	AVAILABILITY
Roll Off	QAWASTE	All	All	
SERVICE CODE ↑		EQUIPMENT TYPE	MATERIAL TYPE	AVAILABILITY
10 Yard Open Top Service		10 Yard Roll Off		All Service Regions
10 Yard Open Top Service - Recycle		10 Yard Open Top	Recycle	All Service Regions
15 Yard Open Top Service		15 Yard Roll Off		All Service Regions
20 Yard Open Top Service		20 Yard Roll Off		All Service Regions
25 Yard Open Top Service		25 Yard Roll Off		All Service Regions
30 Yard Open Top Service		30 Yard Roll Off		All Service Regions
30 Yard Open Top Service - C&D		30 Yard Open Top	C&D	All Service Regions
30 Yard Open Top Service - MSW		30 Yard Open Top	MSW	All Service Regions
30 YD Open Top Minimum Charge		30 Yard Roll Off		Specific Service Regions
40 Yard Open Top Service		40 Yard Roll Off		All Service Regions
42 Receiver Off Service		42 Yard Receiver (Ser)		All Service Regions
Compactor Monthly Rental				All Service Regions
Roll Off Rental Monthly				None
10 Yard Open Top Service with a long description		10 Yard Roll Off		All Service Regions
15 Yard Open Top Service - Recycle		15 Yard Open Top	Recycle	Specific Service Regions
20 Yard Compactor Service		20 Yard Compactor		None
25 Yard Compactor Service		25 Yard Compactor		None

None

- A selection of 'None' will render the service code **unavailable** to all service regions. Service codes marked 'None' will not have access to the Service Regions tab in the lower grid. Additionally, a red background coloring is used to indicate service codes with no availability.

All Service Regions

- A selection of 'All Service Regions' will render the service code available to all service regions within the division.

Specific Service Regions

- A selection of 'Specific Service Regions' will render the service code available to only the selected service regions. The specific service region(s) the service code is available to is further defined in the Service Regions tab in the lower grid.

Lower Grid Tab-Set

The lower grid of the Available Service Code Setup screen displays a tab-set to further establish the setup of a service code. Configuration here is specific to the service code that was selected from the upper grid.

Service Regions | **Default Charge Codes** | Default Rates

SERVICE REGION ↑

Delete Me	<input type="checkbox"/>
Orange County	<input type="checkbox"/>
QA Service Region 2	<input checked="" type="checkbox"/>
QA Waste OPEN MARKET	<input checked="" type="checkbox"/>
SD	<input type="checkbox"/>

Service Regions

The Service Regions tab only displays if "Specific Service Regions" is selected in the Availability column for the service code. From here, use the toggle switches to configure the service code to the specific service regions it applies.

Service Regions | **Default Charge Codes** | Default Rates

SERVICE REGION ↑

QA Service Region 2	<input checked="" type="checkbox"/>
QA Waste OPEN MARKET	<input type="checkbox"/>

Default Charge Codes

The Default Charge Codes tab is displayed only if the service code includes an Equipment Type. If the Equipment Type is null or blank for the service code, the tab is hidden. Use the toggle switches to add or remove a charge code from the service code's setup.

Default Charge Codes		Default Rates	
Search <input type="text"/>			
CHARGE CODE	NAME	EQUIPMENT TYPE	MATERIAL TYPE
ROMUNI	Municipal Roll Off		
RODEL	Roll Off Delivery		
RODRY	Roll Off Dry Run		
ROHAUL	Roll Off Haul		
ROHAUL40	Roll Off Haul 40YD		
ROLFTONS	Roll Off Disposal Per Ton		
ROLFYARDS	Roll Off Disposal Per Yard		
ROLINER	Roll Off Liner / Tarp		
ROMATTRESS	Roll Off Mattress in Load		
ROMINCHG	Roll Off Service Minimum Charge		
ADJ-RO	Adjustment-Roll Off		
CCMSWTON	CCMSW FEE		
DISP_CD	Disposal C&D		C&D

Default Rates

The Default Rates tab enables the configuration of default rates tailored to specific service codes, service regions, and frequencies. With multiple service regions and frequency options available, a single service code can have more than one default rate. When a default rate is configured, it will be applied when an active service is added to a site, provided the rate's configurations match the selections for the active service.
