## Permissions

The following permissions are required to access and edit in the Available Charge Code Setup screen:

Permission ID	Permission Name
118	Setup \ Services

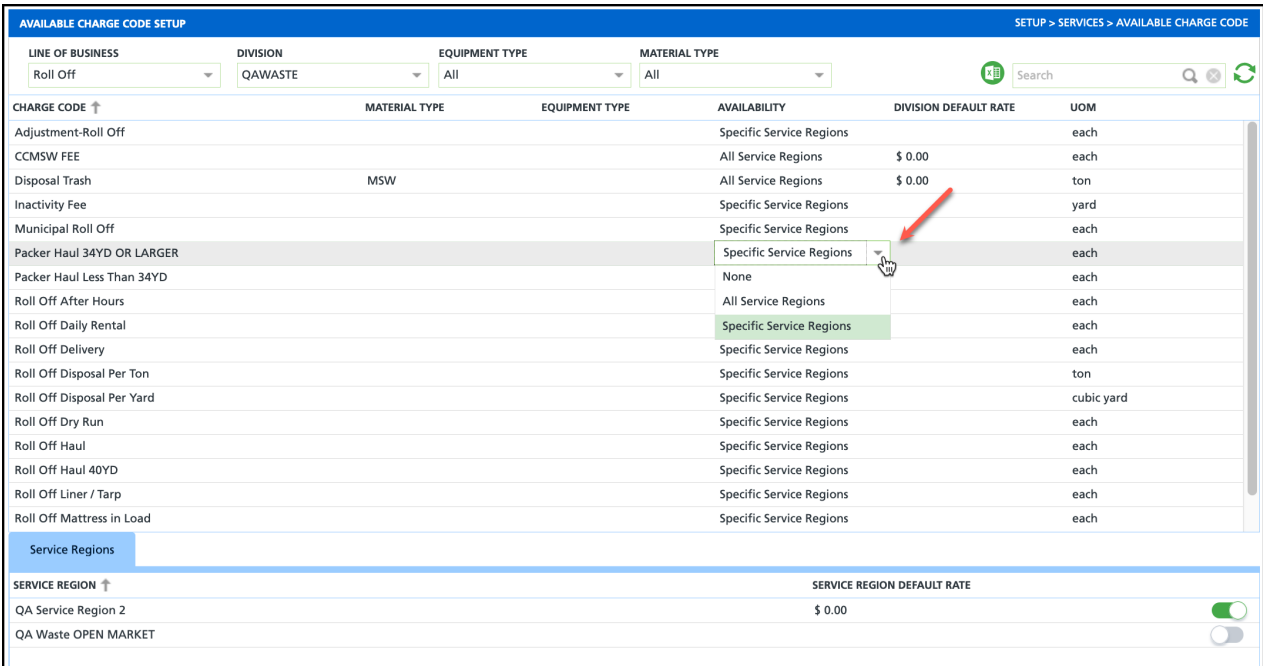

## Field Descriptions

Field	Descriptions
<b>Filters/Selectors</b>	
Line Of Business	Filters to only display the charge codes of the selected Line of Business.
Division	Displays the division for charge codes to be added to or removed from.
Equipment Type	Filters the charge codes to the selected equipment type.
Material Type	Filters the charge codes to the selected material type.
<b>Fields</b>	
Charge Code	Displays the name of the charge code.
Material Type	Indicates the type of material collected by the charge code. Material Type is added/edited in Setup > Services > Charge Code.
Equipment Type	Indicates the equipment used. Equipment Type is added/edited in Setup > Services Charge Code.
Availability	Determines which service regions the charge code is available for. Click within the column to access the drop down menu.
UOM (Unit of Measure)	Indicates how the waste is measured and used in billing calculations. UOM is added/edited in Setup > Services > Charge Code.

<b>Division Default Rate</b>	The default rate for the charge code that is specific to the Division and Service Region. Default Rate is only available after the charge code has been added. Select within the field to enter an amount.
<b>Service Regions</b>	Displays the service regions where charge codes can be added or removed using the toggle switches.

## Charge Code Availability

In the Availability column, users can specify whether a charge code should be restricted to specific regions or be available to all service regions. By clicking on the Availability column in the row of the desired charge code, a selection drop down menu will be displayed.
