

Accounts - Separate Fields For PO Number and Tracking Number (15118)

Last Modified on 04/24/2023 4:04 pm EDT

To better track and correct where the PO Number and Shipping Tracking ID populated into work orders in Core (when created in Account Portal) the 'PO Number/Shipping Tracking ID' field has been separated into two fields.

The screenshot shows a 'Create Order' modal window. At the top, there is a title bar with 'Create Order' and a close button. Below the title bar, the form is organized into several sections. The first section contains a '*Schedule Date' field with the value '04/20/23 Thursday' and a calendar icon. To the right of the date field are two input fields: 'PO Number' and 'Shipping Tracking ID', which are highlighted with a red border. Below this section are three fields: '*Service' (a dropdown menu), '*Order Type' (a dropdown menu), and 'Quantity' (a numeric input field with the value '1'). At the bottom of the form is an 'Order Note' text area. Finally, at the very bottom, there are two buttons: 'Save' and 'Cancel'.
