

# New Account Template Setup

Last Modified on 06/30/2026 12:32 pm PDT

**Pathway:** [Setup](#) > [Account](#) > [New Account Template](#)

**New Account Template Setup** is used to help streamline the "Add Account" process with pre-configured field selections. This feature reduces the amount of manual entry, ensuring that the account setup process is expedited and consistent with the template's predefined values. When a template is selected to create a new account from, fields populated in the template will auto-populate for the account.

## Logic

If a template has an assigned division, its availability is restricted based on the user's division access, as set in their user account. If no division is assigned, the template remains visible to all users.

## Add a New Account Template

To add a New Account Template use the following steps. After a template is created, it is available for selection

upon adding a new account. Templates can not be deleted on the front-end once created.

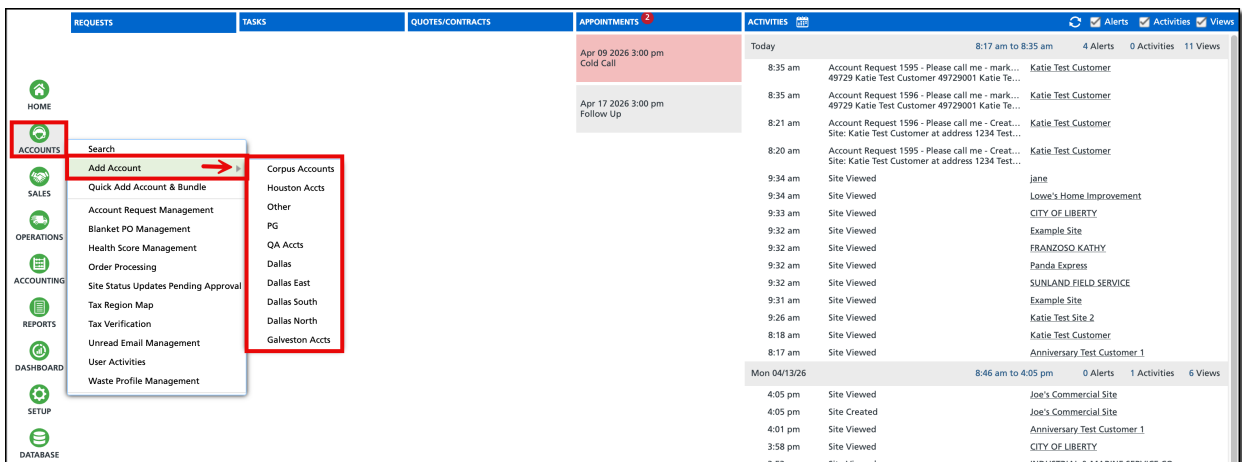

1. Click the **green +** icon to open the Add New Account Template editor.
2. Enter a descriptive **Name** for the New Account Template.
3. Select a **Division** if the template should be made available to only users assigned to that same division.
4. Complete additional fields based on the template's requirements.
5. Click **Save** when finished.

Note: To edit, double click on the New Account Template that needs to be modified from the Setup screen. Make changes and select Save.

## Application of a New Account Template

Account templates made in 'New Account Template' display for selection when adding a new account. Selecting a template option will automatically begin the 'Add Account' process with the preconfigured information.

## Permissions

The following permission is required to view, add and edit in the New Account Template Setup screen

Permission ID	Permission Name
