

Service Record - Payments Tab

Last Modified on 02/29/2024 3:23 pm EST

Pathway: *Accounts > Search: Work Orders > Payments (tab)*

The Payments tab on the Service Record screen enables direct application of payments for services or inbound scale loads. As payments are added, the combined total will display on the Payments tab header.

A separate AR Payment batch is created for every payment for every work order (except for credit card payments that will go to the credit card batch for the day).

Permissions

The following permissions are required to access and add payments to a service record:

Permission ID	Permission Name
5	View Account
6	View Site
