

Operations - New Inventory Management Screen (15458) [Enhancement]

Last Modified on 09/06/2023 1:18 pm EDT

A new Inventory Management screen has been added to the Operations module. The Inventory Management screen effectively tracks and manages equipment inventory at yards and sites. This screen functions through two grids: an upper grid and a lower grid. The upper grid presents each equipment type categorized by the line of business. Upon selecting an equipment type, the lower grid opens to facilitate the addition, review, and adjustment of the equipment's quantity.
