

Inventory Management & Site - Logic Updated to Serial Number field (15670)

Last Modified on 08/24/2023 3:44 pm EDT

The field logic for the Serial Number field has been revised when adding a serialized equipment type. Following this update, the Serial Number field will now be mandatory to complete the equipment entry. This requirement applies whether the equipment is being added through the Inventory Management screen or the Site Inventory screen.

The screenshot shows a web application interface for 'SITE INVENTORY'. A modal window titled 'ADD SITE INVENTORY' is open. The modal contains the following fields:

- EQUIPMENT TYPE:** A dropdown menu with the selected value '10 Yard FL (Ser)'.
- SERIAL NUMBER:** A text input field that is highlighted in red, indicating it is a required field.
- NOTE:** A large text area for entering additional information. A red arrow points to this field.
- SAVE:** A green button at the bottom of the modal.

The background shows a table with columns for 'EQUIPMENT' and 'LAST UPDATED'. The 'Trucks' tab is selected in the top navigation.
