

Notification Templates - Key Paths Available to Text Messages (14544) [Enhancement]

Last Modified on 08/25/2023 12:42 pm EDT

You can now include Key Paths in text messages by double-clicking on them. This will automatically insert the Key Path at the current cursor position.

The screenshot shows the 'ADD NOTIFICATION TEMPLATE' window. At the top, there is a blue header with a question mark and a close button. Below the header, there are fields for 'TYPE' (set to 'Invoice'), 'NAME', and 'ACTIVE' (set to 'Yes'). There is also a 'RESPONSE REQUEST TYPE' dropdown menu. Below these fields are two tabs: 'Email Design' and 'Text Message Design', with the latter being selected and highlighted with a red box. The main area is divided into two columns. The left column is titled 'DEFAULT MESSAGE' and contains the text: 'Account @@accountname;; has a current past due invoice balance of @@balancepastdue0130;'. The right column is titled 'KEY PATHS' and has a search bar. It contains a list of key paths: endingbalance, financechargesamount, has_future_rate_increase, id, ImportedARID, importedinvoices3uuid, invoiceaddressline1, invoiceaddressline2, invoicecity, invoiceid, and invoicemessage_id. At the bottom of the window is a green 'SAVE' button.

Pathway: Setup > System > Notification Template
