

Disposal / Ship Location Setup - Disposal Calculation Updated to Use Internal Rate for Internal Trucks and Disposal Location (15135) [Enhancement]

Last Modified on 09/01/2023 3:56 pm EDT

The setup below is necessary for calculating rates for internal trucks and disposal locations.

Disposal / Ship Location Setup

Pathway: Setup > Operations > Disposal / Ship Location

When the Ownership field of the disposal location is set to 'Internal,' a 'Rate For Internal Trucks' field will display in the Disposal Rate tab. Enter a rate to be used for disposal calculations relating to internal trucks and disposal locations. This rate will be applied when a truck (refer to Truck Setup below), is flagged as internal.

The image shows two overlapping screenshots from a software application. The background screenshot is titled 'UPDATE DISPOSAL / SHIP LOCATION' and has two tabs: 'Basic Settings' and 'Label Scale Settings'. The 'Basic Settings' tab is active, showing a form with the following fields: NAME (GULLEY HURST LF), ABBREVIATION (GULH), TYPE (Landfill), OWNERSHIP (Internal), DIVISION (CORPUS), ADDRESS LINE 1 (1435 Co Rd 26), ADDRESS LINE 2, CITY (Corpus Christi), STATE (TX), and POSTAL CODE (78415). To the right of these fields are several dropdown menus: ACTIVE (Active), ENABLE INBOUND ORDER (No), ENABLE OUTBOUND ORDER (No), DEFAULT SCALE UOM (ton), and WEIGHT UOM (ton). The foreground screenshot is titled 'ADD DISPOSAL RATE' and is a modal window. It contains the following fields: DISPOSAL LOCATION (GULLEY HURST LF), MATERIAL TYPE, ORIGIN, EFFECTIVE DATE (09/01/2023), RATE, RATE UOM, RATE FOR INTERNAL TRUCKS (highlighted in yellow), MINIMUM QUANTITY, and NOTE.

Truck Setup

Pathway: Setup > Operations > Truck

When the Ownership field of a truck is set to 'Internal,' the internal rate is applied when the truck passes through the scale.
