

Report Format Setup - 'View' Hover Logic Updated (15785)

Last Modified on 09/19/2023 11:19 am EDT

The logic has been modified to 'View' with regard to which file types appear upon hovering. When a user hovers their mouse over 'View,' only a preview for image file types will be shown.

The screenshot displays the 'REPORT FORMAT SETUP' application. The 'Manifests' tab is selected. An 'EDIT MANIFEST FORMAT' modal is open for the 'GIC Medical Manifest1' entry. The modal contains the following fields:

- NAME:** GIC Medical Manifest1
- CUSTOM NAME:** (empty)
- CUSTOM TEXT 1:** (empty)
- CUSTOM TEXT 2:** (empty)
- CUSTOM TEXT 3:** (empty)
- BACKGROUND:** View (with a mouse cursor hovering over the link)
- ACTIVE:** Yes

Below the modal, a preview of the 'WORK ORDER BILL OF LADING' form is visible. The background of the modal is light blue, and the preview is light green. A 'Saved.' notification is partially visible at the bottom right of the modal.
