

NavuNav (Android) - Multiple Screen Updates for Search, Sort and Filter (13670, 15672)

Last Modified on 09/20/2023 3:37 pm EDT

The following improvements have been applied to NavuNav (Android):

1. The display of the Search option has been enhanced for search entries. Additionally, the search functionality has been fixed to accurately filter the screen based on the entered criteria and to repopulate the service record list after clearing the search.
2. Route Status filters have been relocated to display at the bottom of the route list.
3. Sort Order has been updated to display as a separate menu item icon with the current selected sort order indicated.
