

Edit Site - Site Custom Settings Not Retaining Value (15901)

Last Modified on 10/13/2023 4:36 pm EDT

An issue has been resolved that caused the Value to disappear from the Site Custom Settings Properties if an edit was made to the site.

The screenshot displays the 'EDIT SITE' interface with a modal window titled 'SITE CUSTOM SETTINGS PROPERTIES' open. The modal contains two columns: 'Value' and 'Note'. The 'Value' column has a text input field containing 'Test', and the 'Note' column has a text input field containing 'CC'. Below the modal is a green 'SAVE' button. In the background, the 'EDIT SITE' form is visible, showing fields for NAME (Staples Center), ADDRESS LINE 1 (1111 S Figueroa St), CITY/STATE/POSTAL CODE (Los Angeles, CA, 90015-1), and SALES REP (House Account (Invalid)). A red box highlights the 'Cost Center - Test (CC)' entry in the 'ACCESS INFORMATION' section, with a red arrow pointing to the modal's 'Value' field.

Pathway: Accounts > Edit Site > [select] Site Custom Settings icon
