

Route List (Android) - Display Changes (15794,13664,13674) [Enhancement]

Last Modified on 11/02/2023 3:00 pm EDT

The route list in the Android version of the NavuNav app includes the following screen updates:

1. Business hours and access information have been moved to display with site information.
2. Sequence changes:
 - Sequence is represented as a blue box on the left for pending stops (red boxes indicate "Do Not Service"); a "plus" icon displayed above the sequence number signifies it as a new stop.
 - Sequence is a calculated value that consistently begins at 1, allowing the driver to easily identify their next stop by locating the "1". The order of the sequence is determined either by the distance or the sequence value assigned in Dispatch, which is selected based on the chosen sorting order.
 - On the map, the stop sequenced as "1" in the route list is displayed with a pin of matching color and sequence number.
3. Day of Week, Route Name and Work Order Number all display with the stop.
4. The following special situations will display in red text for a stop, if applied:
 - New Stop
 - Recent Change
 - Service Ending
 - On Call
 - Non-Weekly
 - Do Not Service

Cole's Flea Market
