

# Work Type Event Class Setup - Inactivate Option Added (16215) [Enhancement]

Last Modified on 01/18/2024 9:30 am EST

The Work Type Event Class screen now features an Active field with 'Yes' and 'No' options for each work type event class. If a work type event class has '0' linked service codes, it can be marked as inactive. In cases where a service code is linked, a hyperlink to the service code screen has been included, enabling the update of the Work Type Event Class field for that service code.

The screenshot displays the 'WORK TYPE EVENT CLASS SETUP' interface. The main table lists event classes with columns for ID, NAME, LINE OF BUSINESS, and LINKED SERVICE CODES. Row 1005 is highlighted in red, with a red arrow pointing to it and the text 'Double click within row'. An 'UPDATE WORK TYPE EVENT CLASS' dialog box is open over row 1005, showing fields for NAME (Landfill), LOB (Landfill), and ACTIVE (No). A red box highlights the 'LINKED SERVICE CODES' column, and a red arrow points from it to a secondary table titled 'SERVICE CODES - WORKTYPE EVENT CLASS (RESIDENTIAL - HAND THROW)'. This secondary table has columns for ID, NAME, PRICING MODEL, CALCULATE RATE PER YARD, WORK TYPE EVENT CLASS, and ACTIVE. The 'WORK TYPE EVENT CLASS' column in this table is highlighted with a red box.

ID	NAME	LINE OF BUSINESS	LINKED SERVICE CODES
1000	Roll off Services	Roll Off	24
1001	Front Load Services	Commercial	26
1002	Residential Services	Residential	16
1004	Residential - Hand Throw	Residential	2
1005	Landfill	Landfill	0
1006	Medical Waste	Medical Waste	2
1007	Transfer	Medical Waste	1
1008	Scale Inbound	Scale	1
