

Inbound/Outbound - Not All Trucks Returned in Search Results (16125)

Last Modified on 02/02/2024 10:18 am EST

An issue has been resolved that prevented trucks added to a site's truck inventory from populating in the Inbound/Outbound search results.

The screenshot displays a software interface for managing inbound and outbound transactions. A modal window titled 'CREATE NEW TRANSACTION' is open, showing a search bar with 'BB' and a table of transaction details. The background table lists various orders with their dates and statuses.
