

Route Management - Updates to Pending Tab (16342) [Enhancement]

Last Modified on 03/08/2024 10:04 am EST

The Pending tab in Route Management has been enhanced to handle stops with servicing spanning multiple days. In this scenario, the service location is listed once on the screen, and the schedule records are grouped. As each schedule record is individually posted to a route, "Posted" will display in its row and the record can no longer be edited from the Pending screen. Once all schedule records for a location have been posted to a route, the service location will no longer display on the Pending screen.

When assigning a route to a servicing date, a "Suggested" route is provided by identifying the nearest active site service schedule for the same line of business and day of the week as the selected record, based on geographic distance. If no matching schedule is found, no suggestion is provided.

LOCATION	ADDRESS	QTY	SERVICE CODE	FREQUENCY	START DATE	ROUTE	SEQUENCE	WEEK OF MONTH
48532001 Navu Recycling	1234 Kingsbrook Rd Houston, TX 77024	13	4 Yard Trash Service 4 Yard FL MSW	3x per week M,W,F	Mon 02/05/24 Wed 02/07/24 Fri 02/02/24	HOU 206	0	Posted
