Account Calendar - Logic Updated to Event Sorting in Calendar (16489) [Enhancement]

Last Modified on 03/22/2024 4:57 pm EDT

Calendar visibility has been enhanced for days with multiple events and user views at a site. Key improvements include:

- User views
 - If more than one user has viewed the site, a total count of user views will display. Hovering over the count will display the list of users and their last viewed time. Previously, these were individually logged.
- Additional Events
 - Additional events are displayed using event type icons. Hover over the icon to reveal a tooltip containing the event details. Otherwise, single-click on the +23 Events (for example) or one of the icons to open a dialog with the full list of events for the day.
