

# GL Transaction Processing - Logic and Functionality Updated to Record ID in GL Setup Errors Screen (16561) [Enhancement]

Last Modified on 04/10/2024 3:05 pm EDT

In the GL Setup Errors screen (within GL Transaction Processing), the Record ID field has been enhanced to display as a clickable link. Clicking on this link will take the user to the screen where the error was found and can be fixed.

The screenshot displays two overlapping application windows. The top window, titled "GL SETUP ERRORS", contains a table with the following data:

RECORD ID	NAME	AR ACTIVITY COUNT	SETUP WARNING
<a href="#">HAZ</a>	Hazardous Material	1	*** Line of business is missing gl segment
<a href="#">MEDICAL</a>	Medical Waste	1	*** Line of business is missing gl segment
<a href="#">SCALE</a>	Scale	1	*** Line of business is missing gl segment

The bottom window, titled "UPDATE LINE OF BUSINESS", shows the configuration for the selected record. The "GL SEGMENT" field is highlighted with a red box. The configuration includes the following fields and options:

- LOB ID: HAZ
- NAME: Hazardous Material
- ACTIVE: Yes
- Settings: Mobile, Optimization, Self-Service Ordering, Profitability
- SCREEN TYPE: 1
- ENABLE USED OIL COLLECTION: No
- GL SEGMENT: (highlighted)
