

Truck Setup (Site Inventory)- Logic Updated to "Mark Inactive" in Edit Truck Screen (16647)

Last Modified on 04/18/2024 9:38 am EDT

The logic for marking a truck inactive has been updated to consider the truck's usage history and its assignment as a default truck for a route. These factors determine the prompts the user will see after selecting the "Mark Inactive" button. This update also resolves the issue of inactive trucks being removed from Site Inventory > Truck.

The screenshot shows the 'EDIT TRUCK' interface with the following fields and values:

NAME	2001	TRUCK TYPE	
DIVISION	HOUSTON	FUEL TYPE	Other
LINE OF BUSINESS	Commercial	VEHICLE INSPECTION TYPE	DVIR
OWNERSHIP	Internal	LICENSE PLATE	
ODOMETER UOM		VIN	
SPEED UOM			

Below the main form are tabs for Capacity, Onboard Scale, Camera System, Maintenance Plan, and Attributes. Under the Capacity tab, the following fields are visible:

VOLUME CAPACITY	28.00	UOM	cubic yard
COMPACTION RATIO			
WEIGHT CAPACITY	54900.00	UOM	pound
TARE WEIGHT		UOM	

A red box highlights the 'MARK INACTIVE' button at the bottom center. A 'CONFIRMATION' dialog box is overlaid on the right, asking 'Are you sure you want to inactivate this truck?' with 'YES' and 'NO' buttons.

Pathway: Setup > Operations > Truck/
