

Line of Business (Setup) - Updates to Setup Screen (16667) [New Feature]

Last Modified on 04/19/2024 1:36 pm EDT

The following changes have been applied to the Line of Business Setup screen:

1. Profitability tab renamed to 'Productivity and Profitability'
2. Route Calculation field renamed to 'Route Profitability Calculation'
3. Work Order Calculation renamed to 'Work Order Profitability Calculation'
4. Addition of new fields:
 - o Route Operating Hours Calculation Method
 - o Automatic 30 Minute Lunch Deduction
 - o Downtime Deduction

The screenshot displays the 'LINE OF BUSINESS SETUP' interface. A table lists various line of business types such as DOCDEST, FEL, HAZ, INACTIVE, LF, MEDICAL, MISC, RESI, RO, SCALE, and UO. An 'UPDATE LINE OF BUSINESS' dialog box is open, showing the configuration for a selected line of business. The dialog box includes a 'NAME' field set to 'Commercial' and an 'ACTIVE' dropdown set to 'Yes'. Below these are several tabs: 'Settings', 'Mobile', 'Optimization', 'Self-Service Ordering', and 'Productivity and Profitability'. The 'Productivity and Profitability' tab is selected and contains the following fields:

- ROUTE PROFITABILITY CALCULATION**: ((Time of first service - time of last service) * operating cost per hour) + disposal cost
- WORK ORDER PROFITABILITY CALCULATION**: (Minutes (start time - end time) * operating cost per minute) + disposal cost
- ROUTE OPERATING HOURS CALCULATION METHOD**: Log in and Log out timestamp
- AUTOMATIC 30 MINUTE LUNCH DEDUCTION**: No
- DOWNTIME DEDUCTION**: No

Red circles with numbers 1 through 4 are overlaid on the image to highlight specific changes: 1 points to the 'Productivity and Profitability' tab, 2 points to the 'ROUTE PROFITABILITY CALCULATION' field, 3 points to the 'WORK ORDER PROFITABILITY CALCULATION' field, and 4 points to the 'ROUTE OPERATING HOURS CALCULATION METHOD' field.

Pathway: Setup > Services > Line of Business
