

# Site Status History (Accounts) - Logic Updated to Effective Date Field (17067)

Last Modified on 07/18/2024 9:35 am EDT

The logic for the Effective Date field in Site Status History has been updated, allowing a site to be made active, inactive, or placed on a vacation hold using the current date.

The screenshot displays a software interface for account management. At the top, account details for 'Wild Mountain' are shown, including address and contact information. Below this is a 'SITE STATUS HISTORY' table with columns for 'SITE STATUS', 'SALES STAGE', 'EFFECTIVE DATE', 'UPDATED BY', and 'NOTE'. The table contains one entry with status 'Active' and effective date 'Jul 12, 2024'. A date picker is open over the 'EFFECTIVE DATE' field, showing a calendar for 'JULY 2024' with the 18th selected. A 'TODAY' button is visible at the bottom of the date picker. To the right, a calendar view shows dates from Jul 5 to Jul 26, with 'Jul 12' highlighted in green.
