Import Account/Site Info

Last Modified on 12/01/2025 10:16 am PST

Pathway: Database > Import > Import Account/Site Info

Use the **Import Account/Site Info** screen to upload customer and site data from a **CSV** file or **PDF**. Before importing, review the file to ensure it meets the required format specifications for a successful import. If any errors are detected, the import will fail, and a message will indicate the issue.

Permissions

The following permissions are required to import accounts and sites:

Permission ID	Permission Name	
354	354 Import Accounts, Sites and Services	

Import File Requirements

The system supports importing both CSV and PDF files. If an error is found in the CSV file, a message will appear showing the specific row and column where the issue occurs. Since columns are referenced numerically, you may want to adjust your CSV file (excel spreadsheet) to display columns as numbers. To do this, enable the R1C1 reference style in your Excel settings.

CSV File Format

Important Warning: External ID Matching

If the values in external_id or external_id_alpha, or parent_id or parent_id_alpha, already exist in the

system, the import process will treat them as matching records and will update or overwrite the existing account or site.

To prevent unintended data changes, these ID values **must be unique**. If there is any possibility that an imported ID already exists in the database, **append or modify the ID** before importing to ensure it does not match an existing record.

Column	Header	Requirements	Instructions
1	Division ID	Required	Division unique id number
2	External ID	Required	MUST BE UNIQUE - NOT EXIT OLD ID IN SYSTEM external_siteID previous system billing site id
3	External ID Alpha	Required	MUST BE UNIQUE - NOT EXIT OLD ID IN SYSTEM external_siteID previous system billing site id
4	Parent ID	Required	MUST BE UNIQUE - NOT EXIT OLD ID IN SYSTEM external_parentID previous system billing account id
5	Parent ID Alpha	Required	MUST BE UNIQUE - NOT EXIT OLD ID IN SYSTEM external_parentID previous system billing account id
6	Account Division ID	Required	
7	Is Child	Required	0 = 1st site/parent 1 = child to parent_id
8	Account/Site Name		
9	Acct Name 2		
10	Address Line 1	Required	
11	Address Line 2		
12	City	Required
