

Service Code Setup (Setup) - Unable To Select Tax Class When Field Is Enabled (17217)

Last Modified on 10/04/2024 9:42 am EDT

Previously, when adding a new service code in the Service Code setup, the list of Tax Class options would not display when the 'Taxable' field was enabled. This has been resolved.

The screenshot shows the 'ADD SERVICE CODE' form with various fields. The 'TAXABLE' field is set to 'Yes' and the 'CLASS' field is set to 'Equipment'. A red box highlights these two fields. The form includes a 'Service Code' tab and a blue header with a question mark and close button. The fields are arranged in two columns.

Field Name	Value	Field Name	Value
SERVICE CODE		ACTIVE	Yes
NAME		ENABLE ROUTING	No
LINE OF BUSINESS		REQUIRE FREQUENCY	Yes
EQUIPMENT TYPE		ENABLE DRIVER UPDATE	No
MATERIAL TYPE		ENABLE ACCOUNT SIGNATURE	No
UOM		ENABLE DRIVER SIGNATURE	No
