

Services List (Operations) - Checkbox Selection and Context Menu Updates (17363)

Last Modified on 01/08/2025 11:27 am PST

The following enhancements have been applied to the Services List screen:

Left and Right-Click Enhancements

Left-click anywhere within a row (that is not a link) and it will cause the selection of the row.

Right-click anywhere within a row and the following logic applies:

- If the row is already selected, the context menu is displayed.
- If the row is not already selected, all previous selections will be cleared, and only the right-clicked row will remain selected and the Context Menu displayed.

The screenshot shows the 'SERVICES LIST' interface with a table of service entries. A context menu is open over the first row, which is selected. The menu options are: '5 rows selected', 'Display on Map', 'Send Service Notification', 'Change Route', 'Change Scheduled Date', 'Change Status', and 'Change Posting Status'. The table columns are: ROUTE, SEQ, ORDER NOTE, LOCATION, SCHEDULED DATE, CREATED ON, and WO#.

Select All / Deselect All Checkbox Indicator

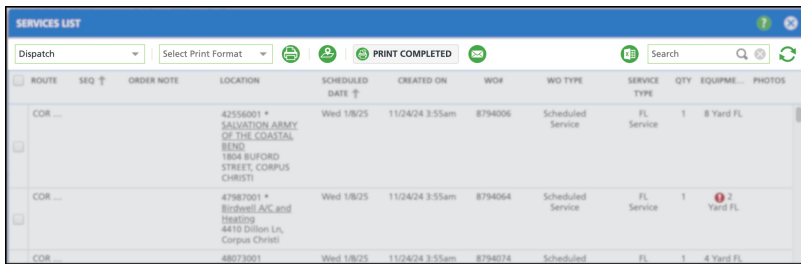

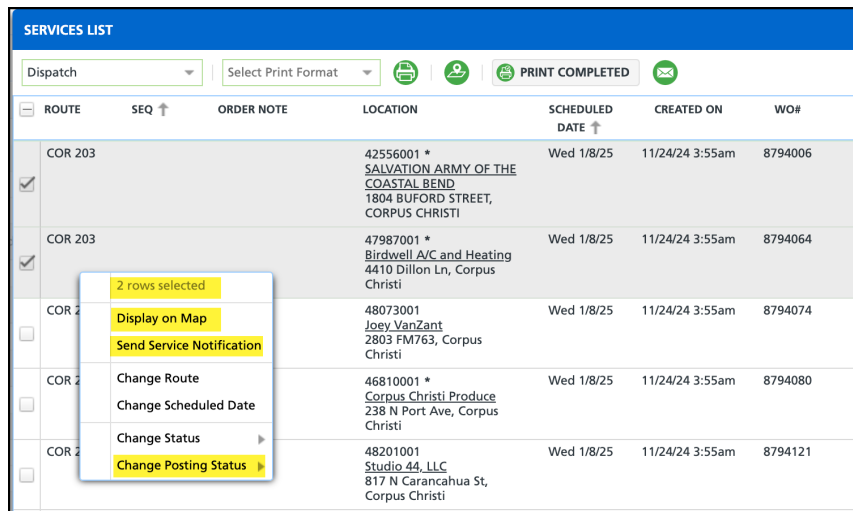

An indicator will display based on the selection status of the check boxes:

- **None selected:** The box is empty.
- **Some selected:** A dash indicator is shown.
- **All selected:** A check mark is displayed.

Context Menu Updates

If multiple rows are selected, the Context Menu will display the number of selected rows along with the following new menu options:

- Display on Map
- Send Service Notification
- Change Posting Status

Toolbar Updates

The following updates have been made to the toolbar:

- The **Set Posting** button has been removed
- The **Edit** button has been removed

Edit Service Records

The "Edit Service Record" option has been removed from the context menu. Its functions remain accessible through the "Change Route" and "Change Scheduled Date" options. Additionally, a "Reset Sequence to 0" feature has been added to the popup editor for both options.
