Inbound/Outbound (Operations) - New Search Type Setting and Logic Update (17935)

Last Modified on 02/19/2025 7:10 am PST

A setting to default the Search Type has been added to the Facility Setup screen. When this setting is enabled, the search type value is automatically populated for new transactions. If the setting is not enabled, the search type value remains blank.

Facility Setup - Establish Default Setting

The default setting for the Search Type drop down in the Inbound/Outbound screen is configured in Facility Setup.

Inbound/Outbound - Search Type

If a facility has a default search setting enabled, it will automatically populate when a new transaction is created.

Pathway: Setup > Operations > Facility > Inbound/Outbound [tab] | Operations > Inbound/Outbound > Create New Transaction [Add icon]
