

# NavuNav (Android) - Updated Permission Logic for Signature Capture (19025)

Last Modified on 08/11/2025 12:39 pm PDT

Previously in NavuNav, the Customer Signature screen did not respect permissions 257 (Add Contact) and 258 (Edit Contact), allowing drivers to add or edit a contact even when these permissions were set to “Not Authorized.” This has been resolved.

The screenshot shows the 'Customer Signature' screen in the NavuNav application. At the top, the status bar displays '2:20 Mon, Aug 11' and a battery level of '27%'. The screen title is 'Customer Signature'. Below the title is a large white box containing a handwritten signature. Underneath the signature box is a green bar with the text 'Save time by picking from a list'. Below this is a light blue bar with a 'Select Contact' button and a right arrow. Another green bar follows with the text 'Or manually enter information'. Below this are three input fields: 'Name', 'Email', and 'PO #'. At the bottom of the screen are three circular buttons: a green back arrow, a green button with a crossed-out signature icon, and a grey button with a checkmark. The Android navigation bar is visible at the very bottom.
