

Permissions (Setup / System) - Updated Permission Description for Route Optimization in NavuNav (19715)

Last Modified on 11/07/2025 2:52 pm PST

Optimize Route was recently added to NavuNav (upcoming Android version 6.6) and now uses the same permission as Dispatch. To clarify that this permission applies to both areas, **permission 366** has been renamed from “**Optimize Selected Routes in Dispatch**” to “**Optimize Selected Routes in Dispatch or NavuNav.**”

PERMISSION SETUP

SETUP > SYSTEM > PERMISSION

MODULE

Operations

366
