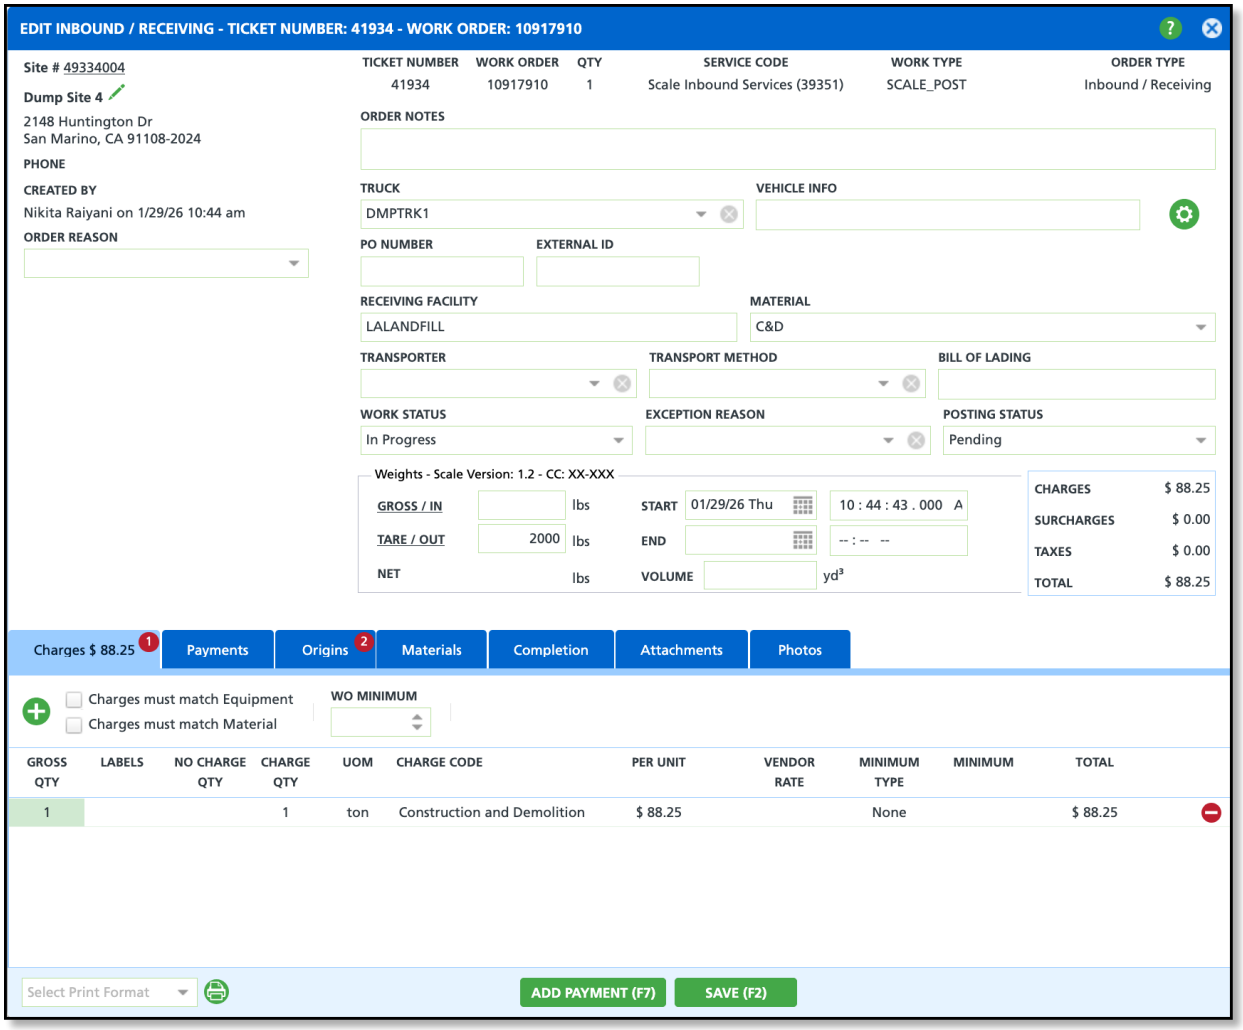
Facility (Setup / Operations) - Functionality Added to Support Origin-Based Fees (19946) [New Feature]

Last Modified on 02/04/2026 8:24 am PST

Edit Service Record

Pathway: *Operations > Inbound / Outbound > Inbound [tab]*

New logic has been added to automatically calculate and recalculate origin-based fees on Service Records when Net Weight, Material, or Origin information is entered or updated. To support this, a new Origin Fees tab has been added to Facility Setup, further detailed below.



Facility Setup

Pathway: *Setup > Operations > Facility*

To support the calculation of origin fees on inbound scale tickets, the Facility Setup screen has been updated to include an **Origin Fees** tab. To access the tab, select a facility in the upper grid; its tab set, including the new**Origin Fees** tab, will display in the lower grid. Select the tab to add new origin fees or edit existing ones.
