

AR History (Accounts) - Anniversary Billing Date Calculation Updated on Preview Invoice Screen (20385)

Last Modified on 02/02/2026 11:27 am PST

Billing date logic has been updated for Anniversary billing customers. Billing dates are now automatically calculated based on the site's anniversary date or active and upcoming services, rather than being manually controlled.

For accounts on Anniversary billing, the **Invoice Date** in the Preview Invoice screen is now read-only and defaults to the calculated next billing date (or today if none exists).
