

Inbound / Outbound (Operations) - Deleting Default Origin Text No Longer Advances to Next Screen (20634)

Last Modified on 03/10/2026 1:35 pm PDT

An issue that caused the Inbound Order creation screen to automatically advance when the default Origin text was fully deleted has been resolved.

Previously, if a user began typing in the Origin field and then deleted the entered text to restart their search, removing the final character would automatically move the window to the next screen. This required the Origin to be entered later in the process, making the workflow less convenient.

The screenshot shows a 'CREATE INBOUND ORDER' modal form overlaid on a list of orders. The form contains the following fields and values:

- SCHEDULE DATE:** 08/14/25 Thursday
- SERVICE CODE:** INBOUND
- ORDER TYPE:** Inbound / Receiving - Inbound
- TRUCK:** (Empty field)
- VEHICLE INFO:** (Empty field)
- MATERIAL:** MSW
- DEFAULT ORIGIN:** test (This field is highlighted in yellow)
- TRANSPORTER:** (Empty field)
- TRANSPORT METHOD:** Truck
- BILL OF LADING:** (Empty field)

A green 'CREATE' button is located at the bottom of the form. The background shows a table of orders with columns for company name, method, status, material, and weight.

Pathway: Operations > Inbound / Outbound
