

# Dispatch (Operations) - Fuel Entry Window Cannot Be Closed After Closing Driver Timeline (20785)

Last Modified on 04/15/2026 1:19 pm PDT

Screen logic has been enhanced to **Driver Timeline** to prevent a user from closing the Driver Timeline screen if they have accessed another screen from it. Example: the user opened Driver Timeline and then selected **Fuel** to open the **Fuel Receipts** screen. In this scenario, logic will require that the Fuel Receipts screen be closed first.

Pathway: *Operations > Dispatch > Driver Timeline* [clock icon]
