

# Database Query (Database) - Fields Added to Work Order Query (20954)

Last Modified on 04/15/2026 12:20 pm PDT

The following fields have been added to the **Work Order** query in the Database Query tool:

- Completion Latitude
- Completion Longitude
- Destination Origin Facility

The screenshot shows the 'Database Query' tool interface. At the top, there is a 'SAVED QUERY' dropdown menu, followed by 'NEW', 'UPDATE', and 'SAVE AS' buttons. Below this is the 'ENTITIES' section, which contains 'Work Order' with a plus sign icon. The 'DISPLAY FIELDS' section is active, showing a table of fields with columns for 'ENTITY', 'SEQ', 'FIELD', 'ALIAS', and 'DESCRIPTION'. A checkbox labeled 'Display Only Selected' is checked in the top right corner of the table area.

| <input checked="" type="checkbox"/> | ENTITY     | SEQ | FIELD ↑                     | ALIAS | DESCRIPTION |
|-------------------------------------|------------|-----|-----------------------------|-------|-------------|
| <input checked="" type="checkbox"/> | Work Order | 1   | Completion Latitude         |       |             |
| <input checked="" type="checkbox"/> | Work Order | 2   | Completion Longitude        |       |             |
| <input checked="" type="checkbox"/> | Work Order | 3   | Destination Origin Facility |       |             |
