

Site Geocoding & Service Time (Operations) - Geocoding Enhancements (21297)

Last Modified on 05/14/2026 10:51 am PDT

The following enhancements have been made to the process of geocoding non-geocoded service sites:

1. The ability to override the **Account Class Default Geocoding Type** has been added. If an Account Class is set to **Street Side** by default, users can now manually update it to **Roof Top** (and vice versa) directly within the record.
2. In addition, sites can now be individually geocoded by clicking the red exclamation icon or all non-geocode sites can be geocoded using the existing **Geocode All** button.

The screenshot shows a web interface for geocoding. At the top, there are three tabs: "Non-Geocoded Service Addresses" (highlighted with a red box and a red circle with the number 1), "Bulk Map Geocoding", and "Bulk Service Time & Windows". Below the tabs, there are several dropdown menus and a "GEOCODE ALL" button. A dropdown menu is open, showing options: "Use Account Class Default", "Roof Top", and "Street Side". To the right, there is a search bar and a refresh icon. Below this is a table with columns: ID, SITE NAME, ADDRESS, NEIGHBORHOOD, CITY, STATE, POSTAL CODE, and COUNTRY. The table contains several rows of data. A red circle with the number 2 and an arrow points to a red exclamation icon in the rightmost column of the table.

ID	SITE NAME	ADDRESS	NEIGHBORHOOD	CITY	STATE	POSTAL CODE	COUNTRY
48999001	Monterey Park Golf Club	3600 W R		Monterey Park	CA	91754-2104	US
49055001	Mother Wolf	1550 Wilc		Monterey Park	CA	91755-5012	US
49033002	Starstruck	1120 S Atlantic Blvd		Monterey Park	CA	91754	US
49096002	Eleven Bakery	381 E Garvey Ave		Monterey Park	CA	91755-1813	US
40212001	Gas B Us	2000 Market Pl Dr	South Montebello	Monterey Park	CA	91755-3402	US
