

Dispatch (Operations) - Multi-Division RFID API Key and Timezone Support (21658)

Last Modified on 07/01/2026 12:33 pm PDT

The issue with the system failing to mark routes as Serviced relative to their local time across different time zones has been fixed. Updates were made to use division-specific RFID API keys instead of one single global API key when processing the RFID data. This ensures accurate route tracking for Dispatch Ops so the services completed are synchronized when working across time zones.

The RFID API Key is provided on the Integrations tab of the *Add Division* or *Edit Division* screens.

The screenshot shows the 'ADD DIVISION' screen with the 'Integrations' tab selected. The 'RFID API KEY' field is highlighted in yellow. The 'ENABLE INTEGRATION' field is a dropdown menu with a red background. The 'LOCK BOX IMPORT FORMAT' and 'LOCK BOX NON-MATCHING DEFAULT ACCOUNT' fields are dropdown menus. The 'MAILCHIMP API KEY', 'MAILCHIMP LIST ID', 'CAMERA EXTERNAL ID', 'WM EDI COMPANY ID', and 'REPUBLIC EDI COMPANY ID' fields are text input boxes. The 'RFID API KEY' field is a text input box with a yellow background and a masked value of '.....'. A 'SAVE' button is located at the bottom right of the screen.

Field Name	Field Type
ENABLE INTEGRATION	Dropdown (Red background)
LOCK BOX IMPORT FORMAT	Dropdown
LOCK BOX NON-MATCHING DEFAULT ACCOUNT	Dropdown
MAILCHIMP API KEY	Text Input
MAILCHIMP LIST ID	Text Input
CAMERA EXTERNAL ID	Text Input
WM EDI COMPANY ID	Text Input
REPUBLIC EDI COMPANY ID	Text Input
RFID API KEY	Text Input (Yellow background, masked)
