

Operations Analysis Report

Last Modified on 07/20/2026 1:18 pm PDT

Pathway: [Reports](#) > [Analysis](#) > [Operations Analysis](#)

The Operations Analysis screen is a powerful, interactive reporting hub designed to give you both high-level operational oversight and granular data-specific visibility. This screen allows you to analyze operational data through 12 different views, or types of reports, ranging from volume and revenue tracking to driver productivity and equipment utilization.

The initial report generated contains summarized data that is always aggregated by month and is dependent on the type of report selected. If a monthly summary metric is greater than 0, the number functions as a clickable hyperlink, allowing you to drill down directly into a detailed view of the data.

Many **Report Types** are provided and can be narrowed down by year, division, service region, and/or line of business.

- Count by Driver
- Count by Equipment Type
- Count by Service Region
- Count by Route
- Count by Status
- Count by Service Region
- Count by Work Type
- Cubic Yards by Route
- Revenue by Driver
- Revenue by Equipment Type
- Revenue by Route
- Revenue by Work Type
- WO Charges Sum by Service Region

Report Parameters

To generate any view on the Operations Analysis screen, you must first define your search criteria using the report parameter dropdown selections at the top of the page.

Parameter	Description
Type	Select one of the report types listed above (e.g., <i>Count by Driver</i>). This selection dictates what is displayed in the initial summary report and the specific metrics calculated.
Year	Restricts the report to only generate data for the selected year.
Division	Restricts results to a specific division or select 'All' to look across all divisions.
Service Region	Restricts results to a specific geographic area or select 'All' to see all regions for that Division
LOB	Restricts results by a specific service sector (e.g., <i>Commercial, Residential</i>) or select 'All' to see all lines of business for the division /service region selection.
Hide ZeroTotal Qty:	Check this box to only display results where there is at least one quantity across the year with a quantity greater than 0.

How to Run the Report

Follow these simple steps to run one of the Operations Analysis reports.

1. Select the **Type** of report you would like to run.
2. Select the **Year** the report should generate data for.
3. Select from the optional filters:
 - **Division**
 - **Service Region**
 - **LOB**
4. Click the **Hide ZeroTotal Qty** checkbox to hide all rows that only have zeros as a total.
5. Select **Load** and the report's results will be returned on the screen.

Understand the Report

While the data changes based on the Type of report selected, the layout and behavior is the same across all types of reports.

Upon clicking **Load**, the system generates a summary report that includes a grid of summarized data:

- **Rows:** Broken down by the entity chosen in your report Type (e.g., Driver Name, Route Code, Equipment Type).
- **Columns:** Broken down chronologically by **Month**.
- **Cells:** The calculated metric total for a given month/entity. If a cell value is 0, it is static. If a value is greater than 0, it becomes a blue hyperlink. The metric is either:
 - A whole number for the "Count by" reports.
 - A currency amount for the "Revenue by" reports.

- A 2 decimal number for the Cubic Yard reports

Clicking any hyperlinked value inside a cell opens a secondary, detailed drill-down report (e.g., the *Count by Driver Details Report*).

Important Note on Data: Drill-down reports display **completed work only** (where the record status is marked *Complete*). This ensures data strictly matches your monthly billing statements.

Report Types

Details about each report type is described below.

Count by Driver

The Count by Driver analysis report contains the total quantity of work orders serviced by driver and by month. As stated above, it can be filtered by Year, Division, Service Region and LOB.

Count by Driver Details - Field Descriptions

Field	Description
Site ID	The unique system id number for the customer's service location. This is a hyperlink that if clicked will open the customer service screen for that that site.
Site Name	The customer's business or property name where the vehicle stopped.
Address	The physical street address where the service took place.
Division	The corporate operating branch responsible for managing this work.
Service Region	The broader territory or dispatch zone handling the route.
Date	The scheduled calendar date the service was performed.
Route	The designated route code assigned to the schedule.
Driver	The full name of the driver who operated the route and completed the stop.
Type	The classification of the work performed (e.g., FL Service).
Work Order #	The unique tracking number for this specific dispatch job. HYPERLINK
Qty	The quantity of containers or items serviced during the stop.
Equipment Type	The size and style of the container or equipment handled (e.g., 6 Yard FL).
Volume	The calculated volumetric size or capacity recorded for the load.
Material	The type of waste or recyclable material collected at the location.
Line of Business	The sector this service belongs to.
Description	Special field logs, driver notes, or unique billing descriptions.
Billed Revenue	The actual amount invoiced to the customer for the service.
Work Order Revenue	The projected or operational revenue mapped to the job for profitability tracking.
Work Type ID	A internal system code used for tracking specific labor/work classifications.

Count by Equipment Type

The Count by Equipment Type analysis report is a summary of completed services by month for each equipment type. It can be filtered by Year, Division, and LOB.
