

Database Query (Database) - New Queries: Portal Users and Portal User Login History (21693)

Last Modified on 07/27/2026 7:52 am PDT

Two new entities are now available via the *Database > Database Query* tool to run queries against, allowing you to review and filter portal users, their login history, and the accounts / sites they have access to.

1. **Portal User Login History** - generates a list of portal users including user ID, name, and email, along with log in and logout timestamps displayed in local time based on division.
