

Dispatch (Operations) - Scale Printed tickets now meet NTEP Standards (18646)

Last Modified on 07/27/2026 1:13 pm PDT

The printed tickets from the inbound / outbound NTEP Scale system have been improved to support compliance with trade specific standards.

The image shows a sample NTEP Scale Ticket Form. It includes a logo for QA Waste Services, contact information, and a table for vehicle and scale details. A red box labeled 'Weights' points to the Gross, Tare, and Net weight fields. Another red box labeled 'Status' points to the Driver Signature field. The bottom of the form shows a reprint status and a timestamp.

Weighmaster Signature

REPRINT - EDITED - Jul 15, 2026 06:27 PM - Paul Gonzalez

Status

Each printed ticket for Scale Ticket Formats 1 and 2 will now have a **status** printed on each page in the bottom left corner along with the timestamp of when it was printed and who printed it.

- **STAGED**: the scale process being documented on the ticket is **not completed**.
- **FINAL**: the scale process being documented on the ticket is **complete** and printed for the very **1st** time.
- **REPRINT**: the scale process being documented on the ticket is **completed** and printed for the **2nd** time or thereafter.
- **REPRINT - EDITED**: the scale process being documented on the ticket was identified as "**Complete**", then **changed** back to "Not Completed", updated, saved and printed again.

Weights

In addition the following changes have been made to the Scale Ticket Formats 1 and 2:

- Scale section added for **Gross**, **Tare**, and **Net** weights.
- **Gross** will always display as the first weight and **Tare** as the second,
- The text labels, "In" and "Out", display based on the event type.
- When scale is used, the scale weight displays; otherwise, the manual weight displays.
Depending on what is used, the labeling will display accordingly.
- For **Tare** weight, either the applicable weight gathered from the scale or the Stored weight for that vehicle is displayed or it is entered manually.
- If any of the weights are NULL, then nothing will be displayed.
