

Standard Account (Reports) - New Report: Diversion Report by Customer (21343)

Last Modified on 07/30/2026 3:29 pm PDT

A new report, the **Diversion Report by Account** report, is now available via *Reports > Standard > Account* to view recyclable and non-recyclable material pickups grouped by material type, facility, and site with calculations for diversion rates and totals. Diversion rates are the percentage of total waste kept away from landfills through recycling, composting, or reuse.

The Diversion Report by Account:

- Returns disposal activity for the selected account and date range.
- Correctly separates recyclable and non-recyclable material.
- Groups results by Material Type, Facility, and Site.
- Calculates ticket counts, quantities, recycled totals, disposed totals, and diversion rates accurately.
- Displays consistent formatting, alignment, headers, footers, and pagination.
- Supports exporting the report for customer reporting.

The following parameters are provided to support generating data for one account, for a given time-frame, for one, multiple or all facilities, and for one, multiple, or all material types.

DIVERSION REPORT BY ACCOUNT

SAVED TEMPLATE

NEW

PARAMETER	VALUE
Account ID *
