Database Query - Active Services Tiered Pricing Rates Entity

Last Modified on 09/23/2026 1:22 pm PDT

Pathway: Database > Database Query

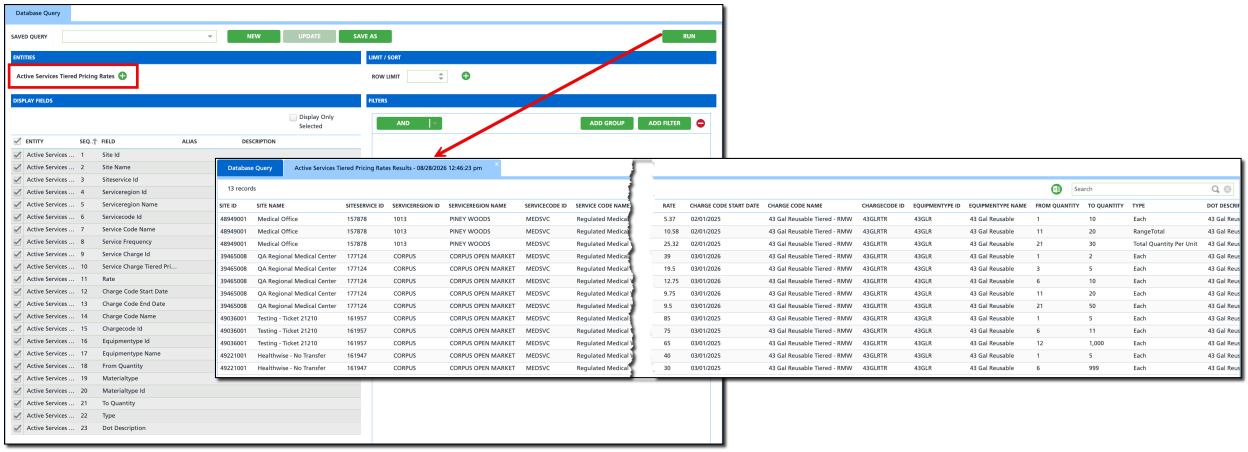

The data extracted using the **Active Services Tiered Pricing Rates** entity contains the details about tiered pricing structures for an active service where the cost per unit **changes** based on the quantity of items serviced (e.g., "The first 5 boxes are $50 each, but boxes 6-10 are only $40 each"). This is most common in regulated medical waste and document destruction lines of business.

Initiating an Active Services Tiered Pricing Rates Query

To generate an **Active Services Tiered Pricing Rates** report using the Database Query tool, follow the steps outlined below. Reference the Database Query article for more details on how to use the tool for reporting.

1. Go to the *Database > Database Query* screen.
2. Click the **New** button in the top control bar. This will open the **Select Main Entity** popup.
3. Select **Active Services Tiered Pricing Rates**.
4. After the **Display Fields** for the **Active Services Tiered Pricing Rates** entity populate, select the check boxes for the fields you want to include in the report.
    - If a specific order is required, select the fields in the order you want them to appear in the query.
5. Click **Run** to execute the query. Results are generated in a new tab with the date and timestamp.

Columns Available for Display

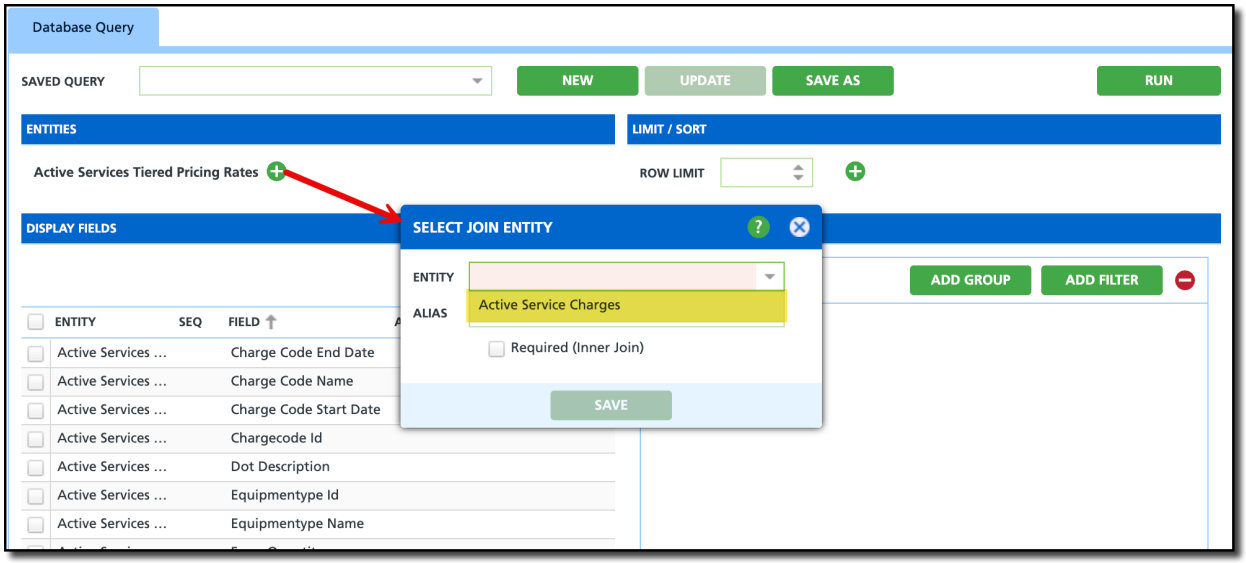

The following data can be pulled in when running an Active Services Teired Pricing Rates report.

Field Name	Description
Site & Service Region	
Site Id	ID for the customer location where services are needed.
Site Name	The name of the customer's physical location where services are needed.
Site Service Id	ID for the specific service at the customer site.
Service Region Id	ID for the geographic service region responsible for the service.
Service Region Name	Name of the geographic service region responsible for the service.
Service Definition	
Service Code Id	ID for the service being provided.
Service Code Name	Name of the service being offered, such as trash collection, regulated medical waste collection and disposal.
Service Frequency	Frequency or fulfillment method for the service, such as scheduled collection, recurring service, or on-call service.
Charge & Pricing Schedule	
Service Charge Id	ID for the service charge record that contains the applicable pricing rules.
Service Charge Tiered Pricing Id	ID for an individual tier within the service charge's pricing schedule.
Rate	Charge applied when the service quantity falls within the associated pricing tier.
Charge Code Start Date	Date on which the charge code and associated tiered rate become effective.
Charge Code End Date	Date on which the charge code and associated tiered rate expire. A blank value generally indicates that the rate remains active.
Charge Code Name	Business name of the pricing schedule or charge structure used to calculate the service fee.
Charge Code Id	ID identifying the charge, rate schedule, or billing rule used for the service.
