Database Query - Active Services Charge Rates Entity

Last Modified on 09/23/2026 1:26 pm PDT

Pathway: Database > Database Query

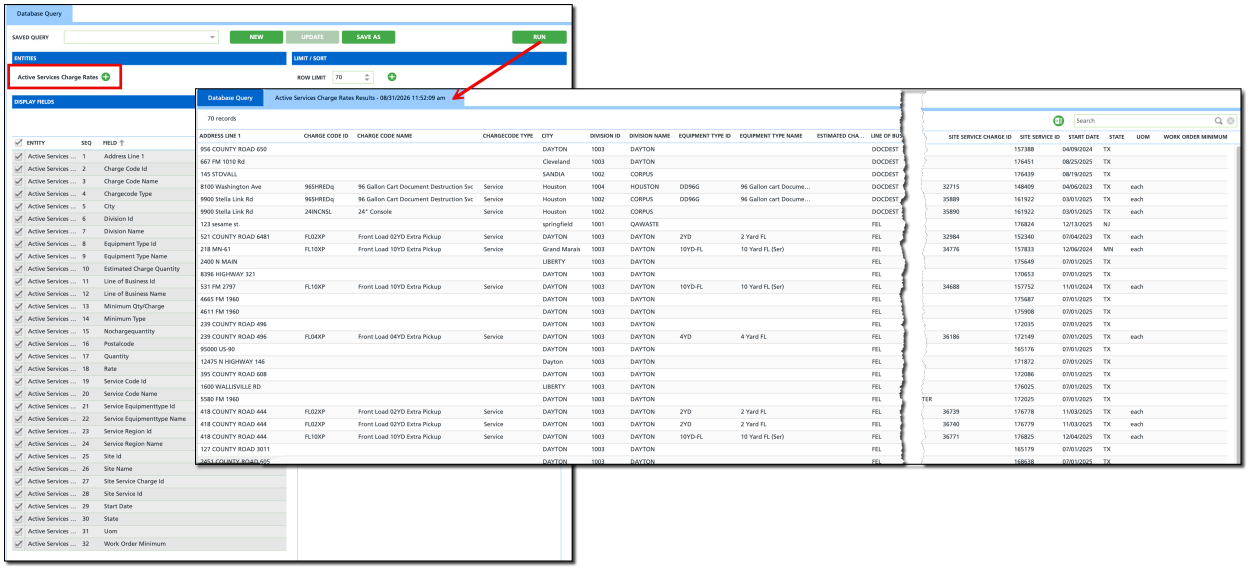

The **Active Services Charge Rates** data contains the flat rate "Price Tag" for every individual component of an active service. It provides a granular look at the specific Charge Codes linked to your active services, showing exactly how each billable event (like a primary service or an extra pickup) is priced for every unique site.

Initiating an Active Services Charge Rates Query

To generate an **Active Services Charge Rates** report using the Database Query tool, follow the steps outlined below. Reference the Database Query article for more details on how to use the tool for reporting.

1. Go to the *Database > Database Query* screen.
2. Click the **New** button in the top control bar. This will open the **Select Main Entity** popup.
3. Select **Active Services Charge Rates**.
4. After the **Display Fields** for the **Active Services Charge Rates** entity populate, select the check boxes for the fields you want to include in the report.
    - If a specific order is required, select the fields in the order you want them to appear in the query.
5. Click **Run** to execute the query. Results are generated in a new tab with the date and timestamp.

Columns Available for Display

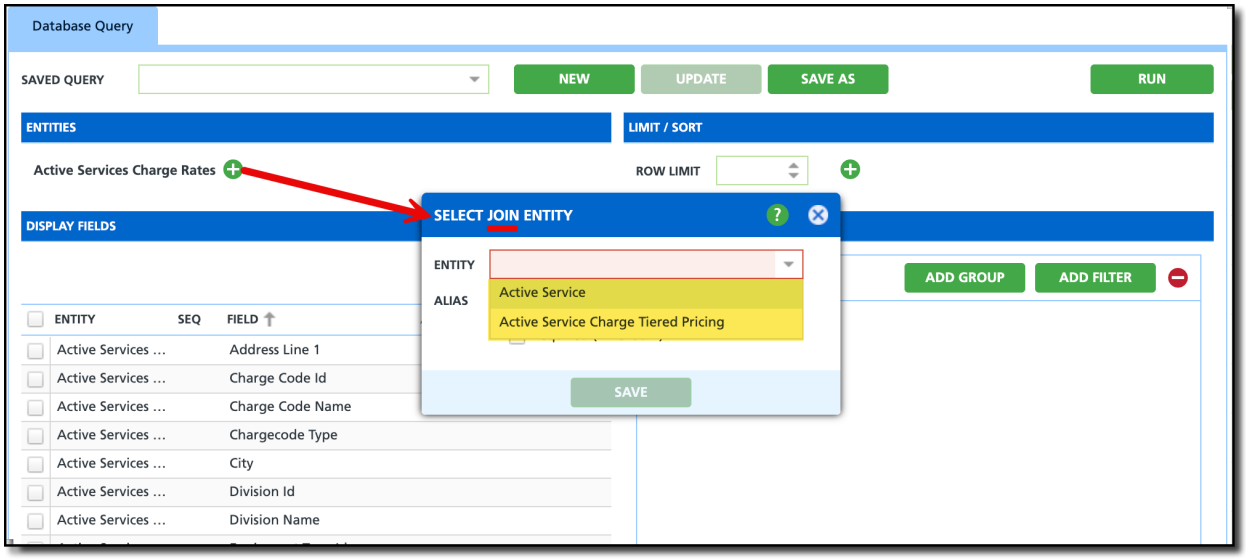

The following data can be pulled in when running an Active Services Charge Rates report:

Field Name	Description
Service Code Information	
Service Code Id	ID for the service being provided.
Service Code Name	The name of the service being offered, such as trash collection, recycling, or regulated medical waste service.
Service Equipment Type Id	ID for the equipment specifically associated with the service code.
Service Equipment Type Name	Name of the equipment specifically associated with the service code.
Service Region Id	ID for the geographic area responsible for the service.
Service Region Name	Name of the geographic area responsible for the service.
Line of Business Id	ID for the business category responsible for the service.
Line of Business Name	Name of the business category under which the service is managed and billed, such as commercial waste, recycling, document destruction, or medical waste.
Charge Code Information	
Charge Code Id	ID for the charge code.
Charge Code Name	Name of the charge code associated with the service, used to calculate or apply a specific service fee.
Charge Code Type	Classification of the charge code that identifies how the charge is used or calculated, such as a recurring service charge, pickup charge, delivery charge, disposal charge, or other fee.
Site Service Charge Id	ID for the charge record assigned to the specific customer service location.
Site Service Id	ID for a specific service arrangement at a customer site.

Field Name	Description
Start Date	Date on which the service charge or charge code becomes effective for the customer site.
Customer Site Information	
Site Id	ID for the customer location where services are needed.
Site Name	The name of the customer's physical location where services are needed.
Address Line 1	Primary street address of the customer site where service activity occurs.
City	City or municipality in which the customer service location is located.
State	State or province in which the customer service location is located.
Postal Code	Postal or ZIP code used for the customer service site.
Division Id	ID for the operating division responsible for managing accounts and services.
Division Name	Name of the operating business unit responsible for managing accounts and services.
Equipment Information	
Equipment Type Id	ID for the equipment associated with the charge.
Equipment Type Name	Name of the equipment associated with the charge rate. This field may be blank when the charge is not equipment-specific.
Quantity & Pricing	
Quantity	Number of containers or units associated with the service.
Rate	Customer charge applied to the associated service, equipment, quantity, or billable activity.
UOM	Unit of measure used to define how the charge is billed, such as each, per pickup, per container, month, or other service unit.
Minimum Qty/Charge	Minimum quantity or minimum charge applied when the service is billed, regardless of the actual quantity requested or collected.
Minimum Type	Indicates whether the minimum value represents a minimum quantity, minimum dollar charge, minimum service occurrence, or another billing threshold.
No Charge Quantity	Quantity of service units included at no additional charge before the applicable rate or charge is applied.
Estimated Charge Quantity	Expected quantity used to estimate the charge when the final billable quantity is not yet available.
Work Order Minimum	Minimum billable amount that must be charged on a work order.

Entity Join Options

When running reports against the **Active Services Charge Rates** entity, the option to pull in data from other entities is provided by utilizing the **Join** feature in the Database Query tool.

Only select entities can join with other select entities. The Join options provided for **Active Services Charge Rates** are:

- Active Services
- Active Service Charge Tiered Pricing

For more details on how to use the Join option for more complex, detailed reporting, reference the Database Query article.
